Investigate local perceptions
surrounding the operation of
diesel canal tour boats

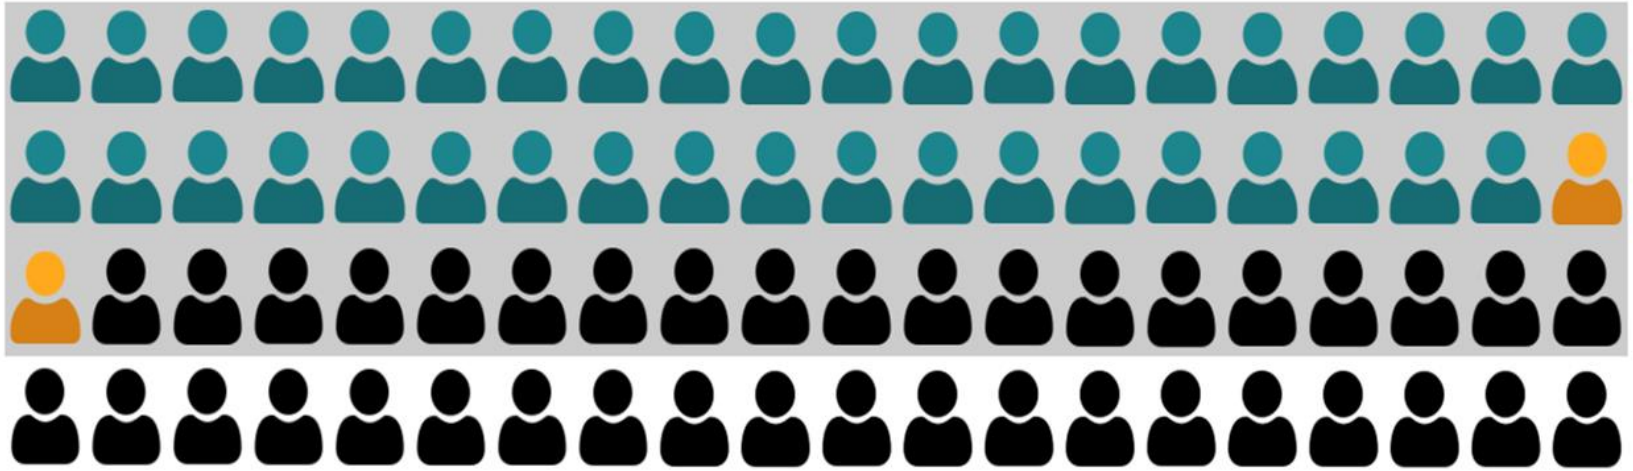

Surveying local opinion

Grønne havne

Vidste du, at flertallet af kanalrundfartsbådene, som sejler i Københavns Havn og kanaler, sejler på diesel og forurener? Det vil vi gerne lave om på og vi vil gerne have dig med.

MILJØPUNKT
INDRE BY & CHRISTIANSHAVN
AGENDA 21 FOR ET BÆREDYGTIGT KØBENHAVN

 Not Disrupted  Noise and Air Disruptions  Air Disruptions ONLY  Lives Near Canal

“It’s really a disgrace for a ‘green city’ like Copenhagen.”

96%

of survey respondents say the canal
tour industry is not in line with
Copenhagen’s sustainability goals

of survey respondents say they would
vote to convert canal boats to electric

What does the community think?

“Harbor cruises sail very **fast and recklessly**. They often do not obey the right of way and do not look out.”

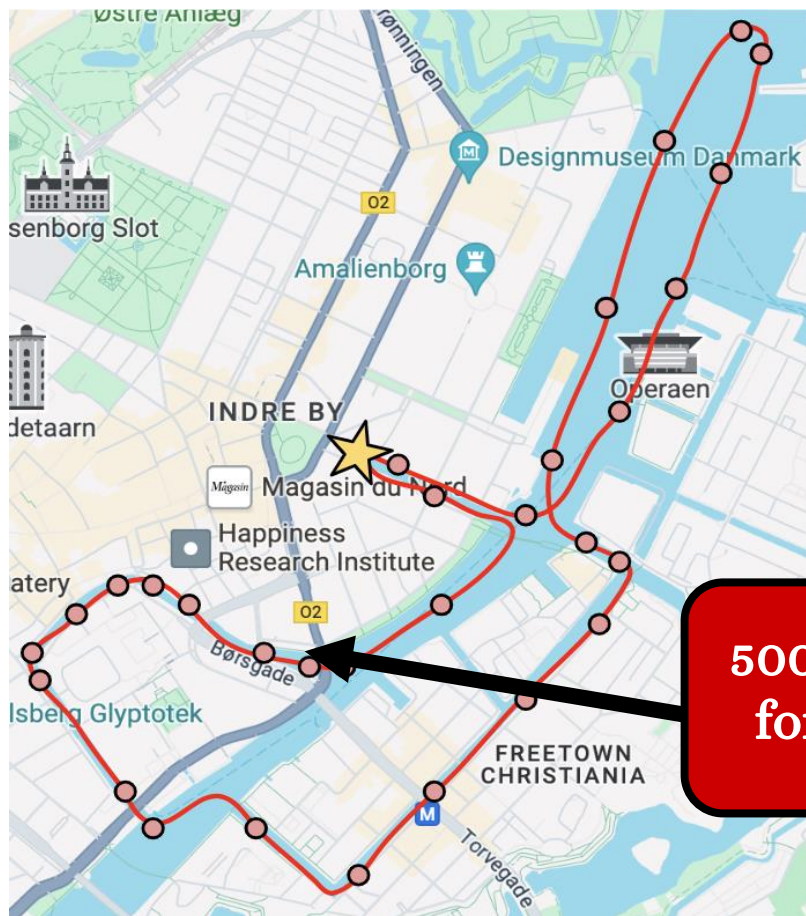

Public comment on the By & Havn website

“Canal tour boats often **intimidate and bully** all other users of the water in the form of tailgating and horn honking. They do not own the water and need to respect other users like the rest of us.”

Public comment on the By & Havn website

“I’ve seen so many, many examples of this bullying. A man who is living in a boat in the canal, he said that **they’re sailing into his boat all the time**, but no one is doing anything.”

Noise pollution: Nettobådene

Location/Comments	Average Noise (db)	Peak Noise (db)
While idling in Nyhavn	68.8	99.8
Started moving, guide speaking	71.9	108.8
Sped up, in harbor	77.8	103.8
Under bridge, engine revved	75.3	106.4
Under bridge, no revving	75.6	99.0
Quiet zone	71.2	-
In harbor	80.1	106.6
"Thread the needle" bridge	73.4	-

Understand the barriers &
incentives influencing the timeline
of emission mitigation

“We want to get there, but we can't take that cost and then not be able to write it off. So how do we find the balance?”

Mads Vestergaard Olesen, CEO Stromma Denmark

Strömma & Netto Violate Environmental Protection Act

§ 4. Stk. 3. Den, der påbegynder eller udøver virksomhed, der kan give anledning til forurening, skal træffe foranstaltninger, der kan forebygge og imødegå denne og tilrettelægge virksomhedens indretning og drift på en sådan måde, at den i mindst muligt omfang medfører forurening

§ 4. PCS. 3. Anyone who starts or runs a business that may give rise to pollution must take measures that can prevent and counter this and organize the organization and operation of the business in such a way that it causes pollution to the smallest extent possible

DEBATE: A green canal tour begins to urgent

 12 April 2024  The harbor front  Debate  1 comment

“Either Strömman must do something themselves (the best), or By & Havn must renegotiate (the next best). If neither of the two solutions comes to the fore soon, I would like Christiansborg to take action and simply legislate in the area.”

Stromma: We are in full swing with the green transition

📅 15 April 2024 🌐 The harbor front 🗲️ The whole city 💬 1 comment

“Strømme would like to support the ambition to make Copenhagen a CO₂-neutral city, and we agree that a conversion from diesel to electric boats represents an opportunity to reduce particle pollution in Copenhagen's densely populated areas for the benefit of the city's citizens”
