FREE WEBINAR:

**STATUS OF MAJOR PROJECTS ON
CONSTRUCTION AND MODERNIZATION
OF HPPS IN THE BALKANS**

APRIL 23, 11:00 GMT

hydropowerbalkans.com

**Join a free webinar “Status of construction and modernization
of major hydropower projects in the Balkans”**

Today **hydropower in the Balkans accounts for about 50% of region’s installed capacity** which is 12.5 GW generated by 53 middle and large HPPs and 203 SHPPs. Technical potential is about three times above the actual usage which is 36 GW. More than 30 hydropower investment projects on construction, rehabilitation and expansion will be developed in the Balkans during next five years.

Explore more about the under-development projects on construction and modernization of Hydropower Plants in the Balkans during the webinar!

[Join the webinar for free](#) on April 23, 11:00 AM GMT

At the webinar you will learn about:

1. **Overview of the hydropower market**, opportunities and forecasts of future development of clean generation in the Balkans;
2. **Most promising projects** on construction and modernization of HPPs for development within 2020-2030 in the Balkan region;
3. **First-hand information** about HPP’s technological improvement and further innovations.

Among the speakers of the webinar:

- **Željko Ratković**, Department of Investments, **MH Elektroprivreda Republike Srpske M.P. a.d. Trebinje**. Topic of the presentation: “Energy Projects of MH Elektroprivreda RS with Relevance to Climate Change”
- **Nevena Djukic**, General Manager, **Energy portal**
Topic of the presentation: “Renewable energy in Serbia”
