Network Strategy

NETWORK STRATEGY

Create a network of advocacy/support for international clubs and cultural associations under the AMIS umbrella.

- Central administration via national secretariat
- Easy to implement templates and frameworks to establish a new club / association
- Focus on activities on the local level

When you have something to fight for, people will come to you.

WHY FOCUS ON INTERNATIONALS?

While there are some local initiatives, there is no association that is dedicated to represent the interest of internationals in Denmark. If we take upon that task, we open up to an untapped market of 600,000 potential members.

Danish Society

We want the Internationals to become a part of Danish society by becoming active both civil and politically.

The Danes

We want the Danes to have less fear of the internationals, and to include them in their private networks. Co-existence in peace is our goal.

The Internationals

We want to unite the internationals under the same platform. We want them to not be afraid to show their culture and maintain it in further generations.

IMPLEMENTATION OF NETWORK STRATEGY

Build the infrastructure

Launch pilot clubs / associations

Expansion of the network across Denmark
