

Dear Ludlow Resident,

The Ludlow Flood Forum has been re-formed with initially 6 members pledging to take Ludlow community flooding concerns and addressing them through a multi partnership approach. To this end we are reaching out to you as a member & householder of the Ludlow community to tell us of any issues you/your family are suffering as a result of the flooding experienced, issues/concerns you may have and any ideas you have regards what you think would help to reduce the risk of flooding. These ideas do not necessarily have to be in our community area, you may also wish to include ideas that maybe implemented **anywhere** up or down stream of our catchment area.

How did the 2020 February flood and any previous flooding in Ludlow affected you personally?
(did you have difficulty getting out & about , your property flooded, have issues with vehicles, drains, ditches farm animals, farming crops etc)

Are there any immediate issues you are dealing with or concerned about that need attention?
(Blocked council owned drains, trees/debris in the river that could cause a blockage, ditches that need attention)

Have you concerns regards the flooding in our area generally? And why?
(its management, concerns about activity upstream from Ludlow on either the Corve or Teme)

Do you receive flood warnings via phone / text /email if you do are they accurate? How have they been inaccurate?
What help would you like in the event of a flood?

Any other comments:

If you would like to be put on our members list, or come onto the committee please fill in your details:

First name: _____ Family Name: _____

Address: _____

Email: _____ Phone: _____

Please return this form to Sarah Dixon 73 Corve St, Ludlow. SY8 1DU

If would like to receive a form to complete via email please contact :
