

Bioomix

Biochemical Engineer

Do you have previous experience with fermentation and product formulation? Are you passionate about green transition? Then you might be our new colleague at Bioomix!

Bioomix is an ambitious and fast-growing bioindustrial company, founded in 2021 as a spin-out from SDU and UWA. We are 16 employees and launched our first biostimulant for seedcoating in January 2023. We are using unique and patented research to develop a new generation of natural, microbial products for agriculture, food, environmental, and health sectors with the mission to make our society more sustainable.

We are seeking an engineer to join our production team. You will be part of a team whose main responsibilities include handling bioreactors, microbial fermentation, microfiltration, spray drying, quality control, shelf-life testing, and logistics. The ideal candidate has a degree in engineering, biochemistry, or similar and previous experience with fermentation and/or downstream processing.

What we offer

- ✔ The opportunity to work at a company that will be one of the frontrunners in the green transition
- ✔ Good colleagues and a positive work environment
- ✔ A workplace with flat leadership structure, where collaboration and co-decision making, is prioritized
- ✔ Opportunities for professional development
- ✔ The possibility to shape the company as it grows
- ✔ Flexible work hours and a generous vacation package

Main responsibilities

- ✔ Ensuring and running a stable production
- ✔ Process development
- ✔ Optimizing parameters related to fermentation, membrane filtration, and spray drying.
- ✔ Performing quality control on products
- ✔ Monitoring and analysing production metrics
- ✔ Participation in tradeshows, conferences, pitches

Qualifications

- ✔ Education within engineering, biochemistry or similar
- ✔ Experience with fermentation, downstream processes and/or formulation technology and equipment
- ✔ Good understanding of working in a sterile environment
- ✔ Ability to work closely in a team
- ✔ The ability to communicate strategies, ideas and results in different settings
- ✔ Good communication skills in English
- ✔ Excellent organization skills with attention to detail
- ✔ A positive can-do attitude and the ability to take initiative

As a person, you are open minded, helpful, and a good colleague. You are passionate about sustainability and want to make a positive impact on our planet.

Bioomix headquarters is located in the center of Odense, and you will be working on site. International candidates that possess a Danish working permit at the time of the interview are welcome to apply.

How to apply

Deadline for applications is **1/4-2023**. Applications must be submitted to job@bioomix.com as **one PDF file**, containing the following:

- ✔ Application where you describe your previous experience with fermentation (and downstream processes)
- ✔ Full CV
- ✔ Full exam transcript
- ✔ References that we can contact

The position will be available during summer 2023. If you would like to know more about us, or the position, please view our website www.bioomix.com. You may contact us for further information about the position.
