Organizational and product level problems in Cynefin™ Frameworks

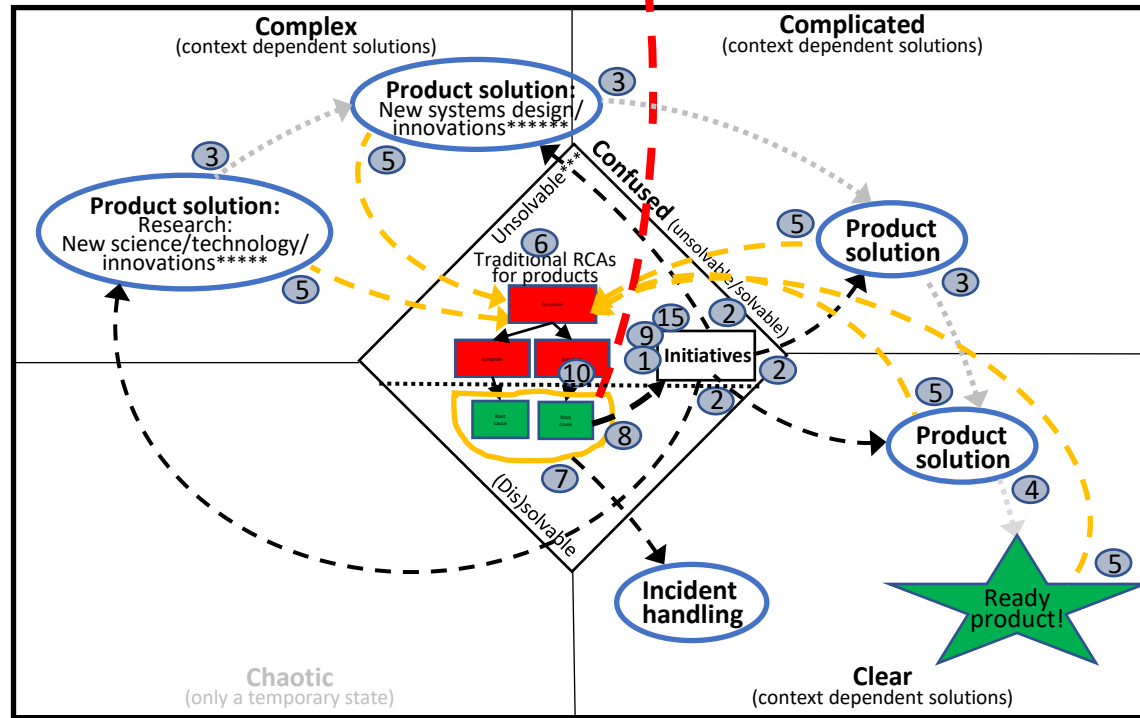

Organizational level
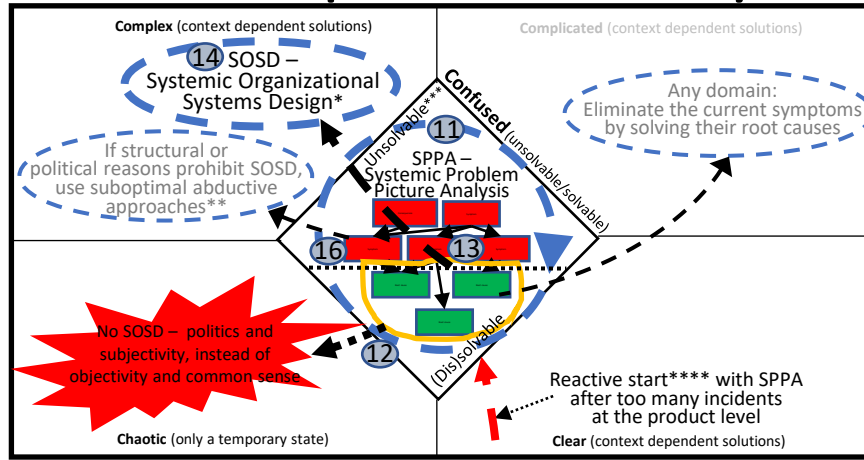

Product level*****

SPPA + SOSD = Proactive Dissolution of self-caused Organizational Problems!

Repeat for continual proactiveness!

The Organizational (self-caused) problems will remain!

Unnecessary incidents = Unnecessary reactiveness!

SPPA – Systemic Problem Picture Analysis   RCA – Root Cause Analysis   WoW – Way of Working   / why?   ⌐ what?   ▲ Note!   ⋯> product flow   →can**** lead to
                                                                                                                                              ⫶ If needed****
*reduces transdisciplinary complexity (all levels)   **like Triopticon®   ***"a mess – a system of problems" (Ackoff)   ****this reactiveness is avoided with continual SPPA and SOSD

*****disciplinary complexity   ******transdisciplinary complexity   *******operating according to current way of working
