# Why Indefiniteness?

- We need to escape the mantras of everything is "uncertainty" or "complexity" or both, or a VUCA world
- Instead we need to sort out what is what, and when
- Indefiniteness is just a word to help us in doing that
- Note! Insolvability is <u>not</u> indefiniteness, i.e., not uncertainty, complexity or variability

1) regarding WHAT to do 　 2) regarding finding a solution (complex context) to WHAT 　 3) regarding finding a solution (complicated and clear context) to WHAT
