

CartoBoK – collection of Cartographic concepts

In an earlier stage, ICA Commissions have contributed in the collection of keywords related to their domain of Cartography. These can be found at bok.cartography.no.

Now we need to elaborate the keywords, and describe these as “concepts” in the “Living Textbook”: <https://ltb.itc.utwente.nl/page/659/dashboard>

For this process we also need help from members of the ICA Commissions;)

At this stage we need you to contribute with (required):

- Name of concept
- Definition of concept
- Contributor

In addition there is also possible to contribute with more information:

- Introduction and closer description of the concept
- Examples
- How to use
- Synonyms
- Resources
- Learning outcomes
- Relations to other concepts

This information can also be added later.

For those of you that would like to contribute to the CartoBoK:

Please send an email to terjem@ntnu.no, and ask for an invitation. You will then be invited to enter your information in a Web-based form.
