GENERAL CHARACTERISTICS

A line of small-sized cooking equipment designed for those who, even in small spaces, do not want to give up great performance. Made of AISI 304 18/10 stainless steel, finely finished with Scotch Brite satin finish, it has rounded edges and large capacity enclosures; it has 600/650 mm depth and modular width of 400/600/700/800/1000 mm; the series is completed by open, armored or refrigerated base supports.

The equipment is easily modular to one another until it forms a compact, gap-free whole thanks to a leak-covering profile that provides protection against leakage and thus maximum hygiene. High chimneys, ergonomic knobs mounted on a sloping dashboard for easy visibility, give the range ease of use from the first approach.

All models are CE approved.

MODEL SPECIFICATIONS

TECHNICAL SPECIFICATIONS

- Constructed of AISI 304 brushed stainless steel.
- Armored resistances in Incoloy.
- Ventilation holes at the top for heat and smoke evacuation.
- Cooking speed.
- Energy efficiency and energy conservation.
- Chrome-plated steel cooking grid with athermic handles that can be

positioned at different heights.

- Temperature control using an energy controller.
- SEF2/0: 2 controls for managing 2 independent cooking zones.
- Easily removable back panel to make the salamander accessible from 2 sides, like a loop.
