

CBC 150 – CLEVER WELDING - oil-free welding release agent, requires no cleaning after welding, before surface treatment

Product description:

CBC 150 – Clever Welding Welding spray

Application:

The welding point is sprayed on in a very thin layer before welding. The product is water-based and particularly suitable for use when welding black iron.

For CO2 welding in stainless and where an X-ray of the weld is subsequently required, a different product is recommended.

Advantage:

Prevents sticking of welding spatter.

Not flammable. Biodegradable.

Not subject to labeling.

Contents:

Packaging: 5 litres, 20 liters and 210 litres
