

CBC 550 – UNI-CLEAN

- Water-based, alkaline cleaning agent

Product description:

CBC 550 is water-based, phosphate-free and environmentally friendly, and particularly suitable as an alternative to cleaning agents with a high content of VOCs and solvents. Biodegradable according to high EU standards. Natural ingredients help with degreasing/cleansing. Ready to use and have adhesive properties.

Application:

Manual cleaning: with cloth, brush or scrub. If it is sprayed on a vertical surface, it remains suspended and is extra effective. Rinse with water or dry with clean cloths.

Advantage:

Environmentally friendly alternative to (VOC-containing) solvents and petroleum. Can be used on many different surfaces: steel, stainless steel, aluminium, non-ferrous metals and painted surfaces. Removes many sources of pollution such as: rubber residues, grease, wax, bitumen oil, carbon. Surface will remain untouched and the original optics will be recovered.

Contents:

pH: approx. 8.0 Safety data sheet see: www.socco.dk/produkter/CBC550
