

# CLEVER CLEAN CLEANER 60

**Compact cleaning tank for economical and environmentally friendly component cleaning without solvents**

## Product description:

Clever Clean Cleaner 60 is an energy-efficient tank with a compact design. It is developed for an ergonomic working position and equipped with wheels, so it can easily be moved according to the task at hand.

The Clever Clean cleaning tank 60 is a double-walled tank made of polyethylene (PE), which is resistant and rust-free. The tank can be heated to 41°C - which is the maximum cleaning effect, providing up to 4 times cleaner items compared to cold cleaning.

The tank is equipped with sensors that detect and signal when sludge has formed at the bottom of the tank. The removal of bottom sludge greatly contributes to extending the durability of the cleaning fluid.

## Technical data

Application	Brush cleaning 60
Volume [l]	
Material	Plastic 790
Width of work surface [mm]	520
Depth of working surface [mm]	870
Height of work surface [mm]	620
Outer length [mm]	890
Width outside [mm]	880
Height outside [mm]	200
Total load capacity [kg]	230
Rated voltage [V]	41
Operating temperature [°C]	
Approval	CE
Weight [kg]	135
