

# CBC 150 – CLEVER WELDING

-welding release agent, requires no cleaning after welding, before surface treatment.

## Product description:

CBC 150 – Clever Welding spray

## Application:

The welding point is sprayed on in a very thin layer before welding. The product is waterbased and particularly suitable for use when welding black iron.

For CO2 welding in stainless and where an X-ray of the weld is subsequently required, a different product is recommended.

## Advantage:

Prevents sticking of welding spatter.

Not flammable. Biodegradable.

Not subject to labeling.
