

CBC 570 - HCC

-Strong alkaline cold degreaser

Product description:

CBC 570 – HCC is an extra powerful cleaning agent for all cleaning tubs that do not use heat, and either have circulation pumps or are used in dip tubs. Specially developed for metal surfaces incl. Aluminum. Effectively removes: rubber, bitumen, wax residues, grease, oil soot and similar. The CBC 570 has a unique component composition that includes surfactants from coconut shells and other natural ingredients. Altogether, this contributes to an excellent dissolving power. Does not foam.

Application:

CBC 570 is added to a tub or drum. And it is ready to use. For difficult tasks, it is recommended to soften the workpiece first. Dipped or applied with a brush or sprayer. After cleaning, the surface must be rinsed or wiped with a cloth.

Advantages:

- Contains no solvents
- Pleasant natural smell.
- Ready to use
- Non-foaming
- Water based

Contents:

pH 10.5
