

QUALITY HOME CARE AND SUPPORT

NOTTINGHAMSHIRE AND SURROUNDING AREAS

Receive care from a fully qualified carer who can assist you with all aspects of your life, from personal care to housekeeping activities and meal preparation.

About Our Company

Jacqueline Mhlanga created Complete Care Needs Ltd. Over the course of her career in the healthcare field, Jacqueline has accumulated more than 20 years of expertise. In our belief, caring for others is a gift that is always appreciated, and Complete Care Needs was founded on this premise.

The term "Complete Care Needs" represents our belief that customers are more than simply a source of revenue, but people in need of love, understanding, and compassion. Years of giving back to people in need have taught us at Complete Care Needs that many things can be taught but not passion, and ours is to care for others.

Our mission is to deliver exceptional and transparent services targeted at each customer, their family, stakeholders, and regulatory agencies. Caring is our speciality, and we do it with love.

OUR LIVE-IN CARE SERVICES

If you've noticed that regular duties are becoming more difficult, you're not alone. Our live-in care services are offered by friendly homecare specialists who are dedicated to assisting you in making the most of your life.

Complete Care Needs believes that everyone has the right to get care in a way that is convenient for them. To us, home is where the heart is, and we have made it our mission to help people in the place where they feel most at peace.

Our live-in care services are personalised because we do not believe in a one-size-fits-all approach. As a result, the people who get our services are able to receive personalised, compassionate care at an affordable cost without having to leave the familiar surroundings of their own homes.

WHAT IS THE DEFINITION OF "LIVE-IN CARE"?

A professional carer provides live-in care at an individual's home.

For example, 24-hour live-in care assigns you a full-time carer who lives with you and assists you with meals, clothes, bathing, shopping, and medicine around the clock.

Live-in care services offer help that is tailored to your needs, whether you need care 24 hours a day for a serious health condition or just need help with everyday tasks.

Complete Care Needs hires care providers that are well-trained and dedicated to providing a person-centered, professional service. Each of our carers is personable, courteous, and skilled, so you can relax knowing you're in good hands.

CARE TAILORED TO YOUR NEEDS**

WHAT YOU SHOULD KNOW ABOUT THE COSTS OF LIVE-IN CARE

Complete Care Needs thinks that everyone should be able to get skilled, low-cost live-in care, so we offer a number of customized, low-cost packages.

Many people assume that live-in care is unreasonably expensive. This is not true. In fact, by tailoring your therapy, you will be able to keep your costs under control since you will only pay for the treatments you require.

And our helpful care consultants will walk you through the process, explaining your options and working with you to create a live-in care package that meets your needs. They will also set up affordable payment plans that give you control over all of your live-in care costs.

Furthermore, depending on your circumstances, a range of funding options are available. Your local government will assess your position before completing a financial appraisal, taking into account the degree of care necessary. (This is also known as a "means test"). Your benefits, salary, savings, and assets will be looked at to see if you are eligible for in-home care support.

HOW WE CARE FOR YOU

Meal preparation and planning

Carers will prepare your meals and, if time allows, cook for you to ensure that you eat at the proper times throughout the day. In the event that they are unable to visit you at every mealtime, they will prepare meals for you that you can simply reheat in the microwave.

Post-discharge care

Carers can offer post-discharge care in the comfort of your own home if you require support following hospital treatment or surgery, such as a hip replacement.

Domestic and household assistance

If you hire a carer, they may help you with housework so you can keep up with your cleaning schedule.
