

COWES TORQUAY COWES 2021

BULLETIN NUMBER 1

DATE ISSUED: 24/6/2021

SUBJECT: Refuelling allowance for Class IV boats.

The BPRC are pleased to announce that Class IV competitors wishing to compete in the Cowes Torquay Cowes powerboat race will be permitted to stop and refuel at Torquay. This concession applies to Class IV boats only.

All such competitors wishing to take advantage of this opportunity are required to notify either the Officer of the Day or Safety Officer, well in advance of race weekend.

Please note, the BPRC will not be providing a dedicated fuel facility for competitors and as such they will be required to use the public fuel berth in Torquay Marina.

Any such competitors will be required to adhere to strict speed limits and all pertinent maritime navigational regulations whilst transiting to and from the fuelling berth. Failure to comply will lead to disqualification of the event at the committee's sole discretion.

There will be no time compensation for those wishing to stop for fuel, meaning their total elapsed time for the event will continue to accrue throughout this period.

Should any craft choose at that point not to resume the race, they are required to immediately notify race control of their retirement from the race.
