

ENVIRONMENTAL POLICY

Ecoserve Cleaning recognises that day-to-day operations can impact both directly and indirectly on the environment. We aim to protect and improve the environment through good management and by adopting best practice wherever possible. Ecoserve will work to integrate environmental considerations into our business decisions and adopt greener alternatives wherever possible, throughout our operations.

The Director will offer full support and leadership to management team to ensure that the policy is clearly communicated to all employees and to encourage and train all staff to comply with the aims of the policy and to make sure we comply with the government targets to reduce by 50% the emissions levels by 2025.

We work closely with suppliers that are committed to contribute towards the environment by using recycled materials, environmentally friendly chemicals and energy saving products.

The implementation of this policy will enable us to ensure we meet the following aspects:

- Meet or exceed with all relevant environmental legislation and targets
- Minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Minimise toxic emissions through the selection and use of its equipment and the source of its power requirement.
- Actively promote recycling both internally and amongst its customers and suppliers.
- Source and promote a product range to minimise the environmental impact of both production and distribution.
- To preserve natural resources by the use of energy management efficiency together with the minimisation of waste and the commitment of recycle and re-use.
- To acquire products that use reclaimed, recycled or renewable resources.

Ecoserve cleaning Environmental policy is to conduct its management and all employees to contribute to our environment in a responsible and sustainable manner, to protect the environment not just for the present generation but for future generations. The company commitment is to reduce the impact to the environment by using the latest developments in technology and materials.
