

# FREYA F-55 HYBRID SATELLITE TERMINAL

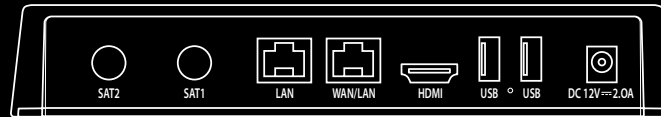

Internet access and TV/video viewing in one box.

## Internet Connectivity

- Accelerate existing terrestrial infrastructure to broadband capabilities
- Supports 2G/3G/ADSL/WiMAX etc
- Integrated with the Mimir Hub

## CPE Key parameters

- MPE/ULE support
- Wi-Fi hotspot
- Dual DVB-S2 tuners
- Remote control
- HDMI/Video out
- Store and playback function

## Multicast

Everyone can now access Video on Demand services independent of location. Push down educational material or your latest TV series.

## On demand Acceleration

Get the best user performance by combining and/or switch between the technologies. Use e.g. mobile for the low latency applications and satellite for streaming or both when needed.

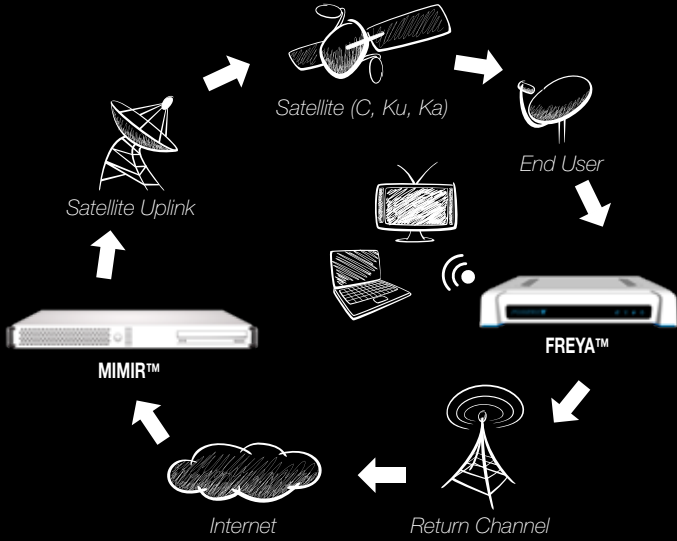

## Bonding of traffic

We bond all technologies but in low latency 2G networks it makes a great difference to bond two channels. Just add a 2nd USB dongle.
