

ODIN F-50 HYBRID SATELLITE ROUTER

Designed for high capacity, low cost and flexibility.

Internet Connectivity

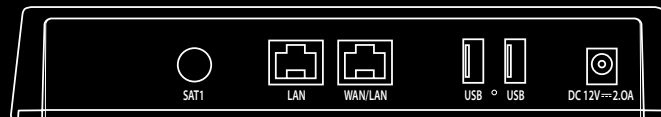

- Accelerate existing terrestrial infrastructure to broadband capabilities
- Supports 2G/3G/ADSL/WiMAX etc
- Integrated with the Mimir Hub

CPE Key parameters

- MPE/ULE support
- Wi-Fi hotspot

Product Versions

- Sat in / mobile return
- Sat in / xDSL return
- DVB-T2 in / mobile return
- Sat in / Inmarsat return

Multicast

Everyone can now access Video on Demand services independent of location. Push down educational material or your latest TV series.

On demand Acceleration

Get the best user performance by combining and/or switch between the technologies. Use e.g. mobile for the low latency applications and satellite for streaming or both when needed.

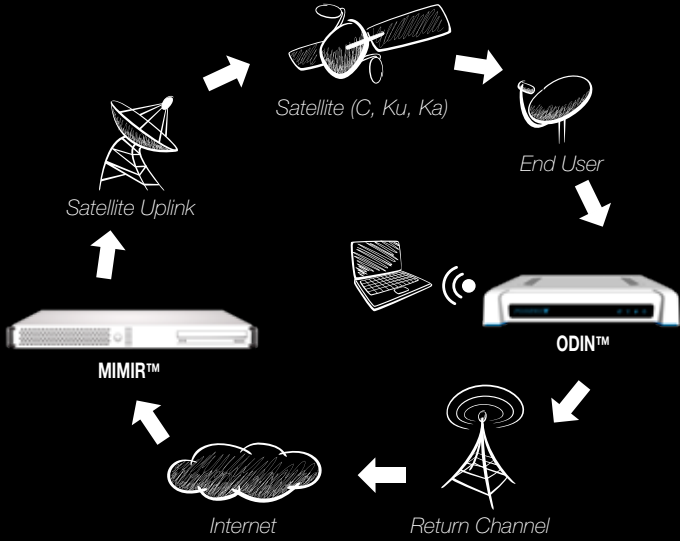

Bonding of traffic

We bond all technologies but in low latency 2G networks it makes a great difference to bond two channels. Just add a 2nd USB dongle.
