

Precision  
in Motion

**TechnoVector 7 –  
Machine vision  
wheel alignment systems**

**TechnoVector wheel adaptors**  
support rim sizes from 12" up to 24"

**Unique WideScope technology**

- Perform measurement at a wide range of lift heights\* without repositioning cameras.
- A more compact installation without any loss of accuracy
- Significantly decreases the time it takes to perform an alignment

\* - depends on the installation distance

(See pages 6-7 for more details)

**TechnoVector** wheel aligner has four or two Widescope high-resolution cameras in two separate posts or a single beam. Cameras are installed in front of the car. Targets are attached to the car's wheels using wheel adaptors.

**Digital high-resolution cameras** with an embedded IR backlight allow the TechnoVector software to track precise spatial positions of each target

Easy-to-use and lightweight and compact wheel adaptors and targets

**The ultimate innovation in wheel alignment**

**Mobility.** Free movement between working areas of the repair shop.\*  
\* - for select Techno Vector models

*TechnoVector wheel alignment systems use cameras to observe targets determining wheel's precise position in 3D space*

Perform compensation for all 4 wheels simultaneously by rolling the vehicle

**Machine Vision System**

**Cameras**

High-definition cameras capture targets and transfer image data to the TechnoVector software

The software calculates highly precise positions of targets in 3D-space

The use of machine vision technologies allows high-precision readings

Firmware promotes a real time display

**Targets**

Retroreflecting targets without any electronic components with a protective layer coating

**Optima series**

- Easy to use
- Light and compact targets
- Rubber frame to protect from accidents

**PRO series Premium series**

- Easy to use
- Super-light magnesium alloy targets
- Plastic frame to protect from accidents
- Support magnetic and 3-point wheel adaptors

Four-camera wheel aligner's kit

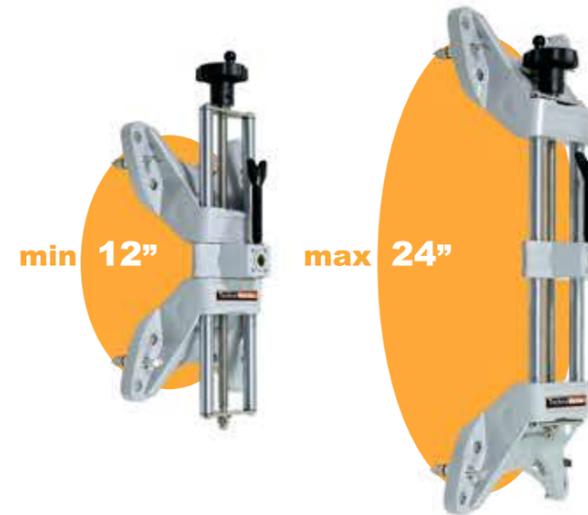

Two-camera wheel aligner's kit

**Wheel Adaptors**

Self-centering wheel adaptors with the adjustable central mechanism support 12" to 24" wheel rims and are compatible with light duty and middle duty vehicles

Adaptors

Double sided studs make it easy to attach wheel adaptors to both steel and light-alloy rims

**Optional equipment**

Set of magnetic wheel adaptors

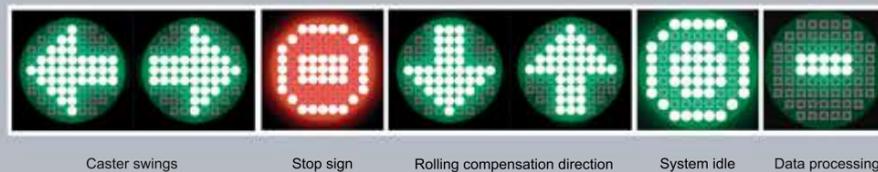

Set of 3-point wheel adaptors

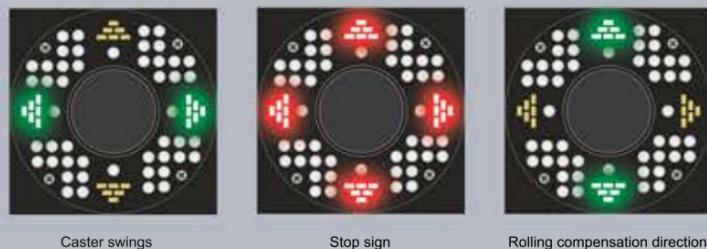

**Two-camera wheel alignment systems**

Additional display with helpful hints. Useful when the technician has no line of sight to the computer's screen.

**Four-camera wheel alignment systems**

Additional display with helpful hints. Useful when the technician has no line of sight to the computer's screen.

**Wide-angle machine vision system**

Key advantages of the WideScope technology

- Measure and adjust at any lift height \*
- Accommodate to the workplace. Install closer or further away, depending on the space available
- Continue adjustment even if the target's is partially occluded

\*depends on the installation distance (see page 7)

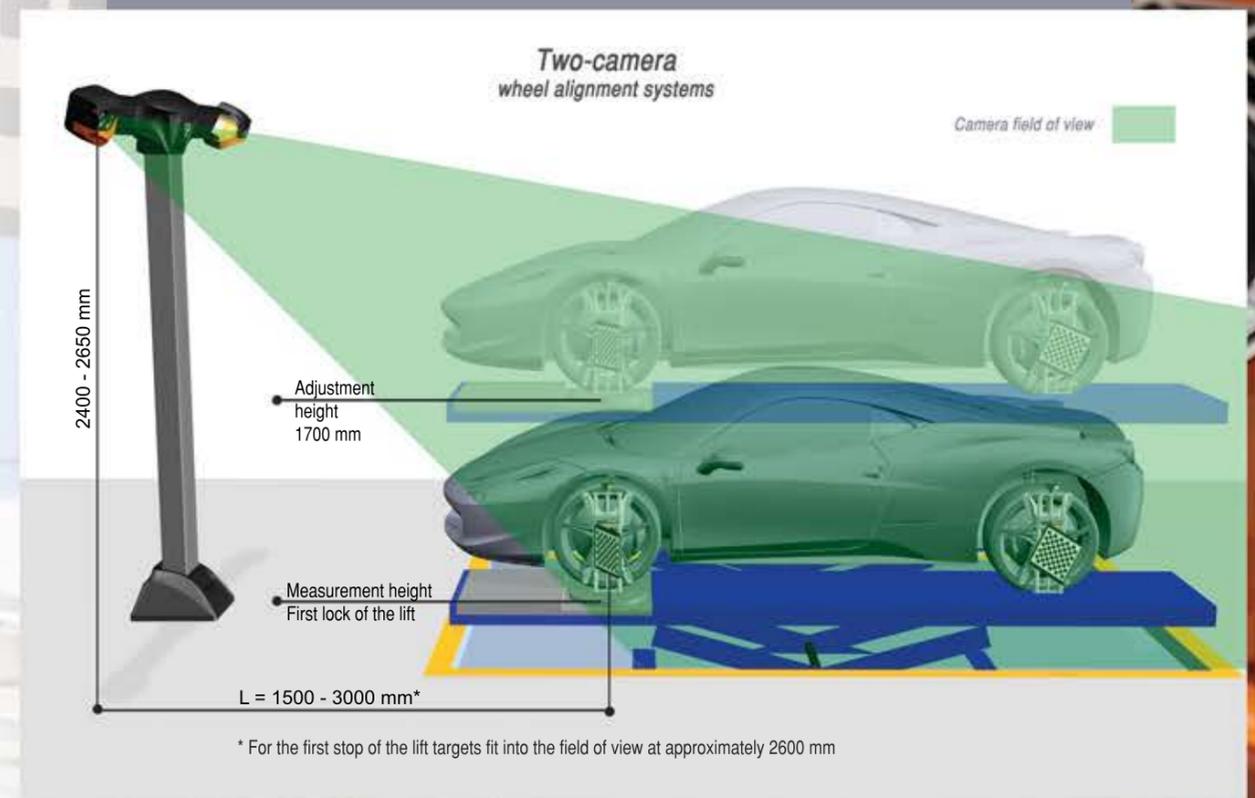

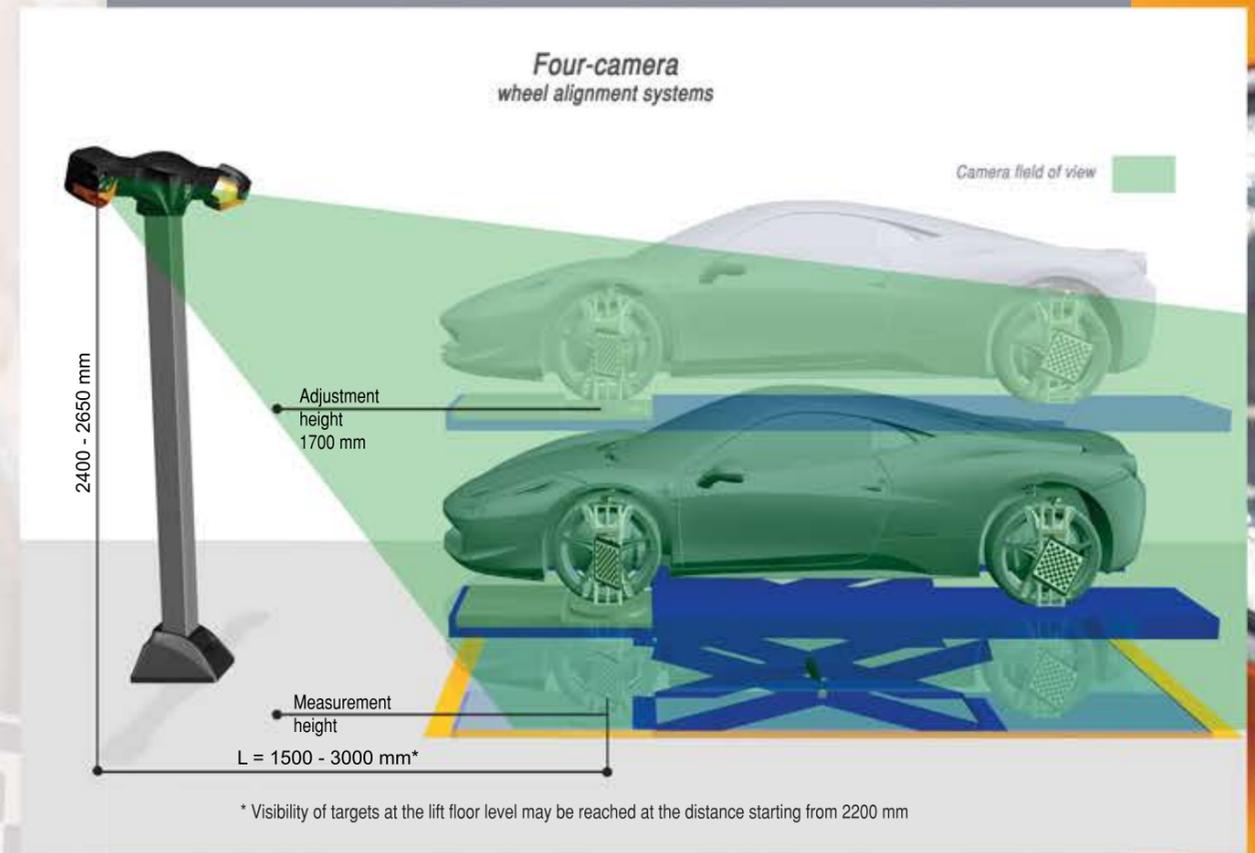

**WideScope**®

**Lift position tracking**

This feature can be useful if the lift can't stay level at different heights.

The software automatically detects lift movement and compensates the difference.

Camera field of view diagrams with WideScope technology

Computer Cabinets

P series

V series

T series

S series

Computer cabinet includes

- PC with an Intel/AMD processor and a Windows 10 operating system
- 21.5"+ widescreen monitor
- VESA bracket for the monitor
- Printer
- Remote control (2.4Ghz connection)
- Four brackets to store wheel adaptors

Available colours

Universal telescopic monitor bracket (for V- series and T- series)

Adjust the monitor's height and tilt to achieve best possible monitor's position at the workplace

Specifications

Parameter	TechnoVector 7		
	Measurement Range	Maximum Error	Average Error
<b>Front axle</b>			
Camber	±8°	±3'	±2'
Front Total Toe	±5°	±3'	±2'
Caster	±19°	±8'	±5'
SAI / KPI	±19°	±8'	±5'
Lock Angle	±45°	±10'	±5'
<b>Rear axle</b>			
Camber	±8°	±3'	±2'
Rear Total Toe	±5°	±3'	±2'
Rear Individual Toe	±2,5°	±3'	±2'
<b>Symmetry angles</b>			
Front SetBack	±2,5°	±3'	±2'
Rear SetBack	±2,5°	±3'	±2'
Thrust Angle	±2,5°	±3'	±2'
Geometrical Driving Axis	±2,5°	±3'	±2'

Marking

**V 7 2 0 4 T 5 A D**  
 1 2 3 4 5 6 7 8 9

- 1 Computer cabinet series (P, V, T, S)
- 2 Wheel aligner's model generation (7 for TechnoVector 7 series)
- 3 The amount of axles measured simultaneously
- 4 1 – mobile, 0 – stationary
- 5 Total camera count
- 6 Housing type: T, H, M, K
- 7 Maximum camera resolution: 1 – 1.3Mp, 5 – 5Mp
- 8 Wheel aligner's series. Premium, Pro, Optima
- 9 Optional symbol for a beam inclination drive

Delivery Set

TechnoVector 7 (Standard accessories)

1. Machine vision system	1
2. Computer cabinet	1
3. Personal computer	1
4. Set of targets	4
5. Set of wheel adaptors	4
6. Steering wheel holder	1
7. Brake lock	1
8. Set of turn tables	2
9. Remote control receiver	1
10. Remote control	1
11. Manual	1

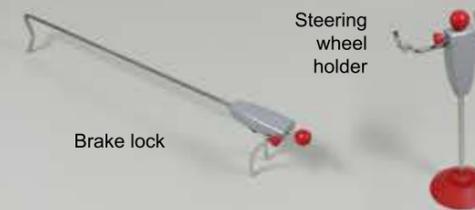

Set of targets & clamps

Set of turn tables

Personal computer

Brake lock

Steering wheel holder

Remote control

**TechnoVector Software**

The **TechnoVector software** is a powerful and modern application with all the tools necessary for fast and easy wheel alignment

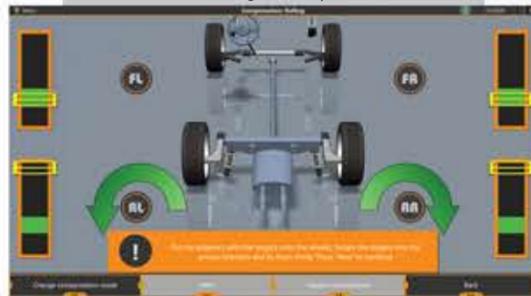

Continuously tracks wheel positions and updates the information on screen

## Database Image View

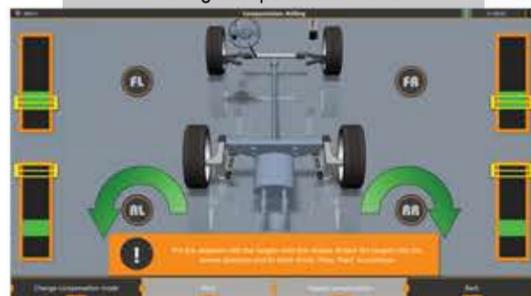

Measured values are always compared to the vehicle's specs

## Target Setup

## Rolling Compensation Mode

Big font and coloured value state indication help you adjust the vehicle from afar

Multiple various visualization modes to pick from

The TechnoVector software runs on a PC and uses the **Windows 10** operating system

## Measurement Mode

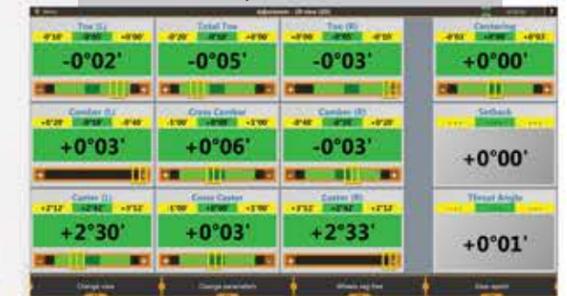

## 3D Adjustment Mode

3D visualization, 7 Modes

## 2D Adjustment Mode

2D visualization, 2 Modes

## Report View

**Database**

includes data for more than 60000 vehicle model:

- wheel alignment specifications
- tire pressure specifications
- 3D animation
- adjustment diagrams and images

asanetwork

The TechnoVector software supports ASA Network (a car workshop IT framework). ASA Network supports centralised order creation and data sharing across all the devices in the workshop network.

**Free database updates**

on the TechnoVector website! Send reports to your customers via TechnoVector mobile app, e-mail or text messaging to reduce the paperwork and improve customer service

**3D Animation**

### Configurations

Pick a configuration that fits best to your workshop needs

Up-to-date wheel aligners for modern car shops

#### Optima series

Light version of the TechnoVector wheel alignment system

#### Initial installation of the device

The initial installation of the equipment is performed by the manufacturer's service technicians. The device works with a 4 post wheel alignment lift or a repair pit, compliance with the horizontality requirements is strongly recommended.

Available colours

#### PRO series

Wheel aligners with colourful, appealing, expressive, and dynamic design

#### PRO Mobile series based on PRO

Move the entire wheel aligner to the place you need it to be at

#### Premium series

The flagship of the TechnoVector 7 series

### Mobile App

#### TechnoVector Report Viewer

- Customers can use this smartphone app to gain access to the wheel alignment reports of their cars. Works on Android and iOS.
- The TechnoVector software can send the report data to the app at any time you need. The customer is identified by an e-mail address or a phone number. The wheel aligner must have an internet connection.
- If the internet connection is unavailable customers can obtain an alignment report using a QR code on the screen or in the printout.
- Reports can be viewed in the mobile app and exported as an HTML or PDF file.

### Online reports

A full adjustment report can be viewed on a mobile device in the browser even without installing the TechnoVector assistant by scanning a QR-code on the screen or in the print-out. Internet connection is not required.

The TechnoVector software can send a report link to the customer via e-mail or text messaging

A print-out or a report on the tablet's screen is useful when explaining details about the alignment procedure to the customer

### TechnoVector Assistant

- Take photos and perform license plate recognition, automatically filling the order data (if such data available)\*.
- Take photos and attach them to the current order.
- View current wheel alignment data to the mobile device's screen. Pick one of the several modes to best fit your workflow.
- Control the wheel aligner. TechnoVector Assistant app can be used as a remote control.

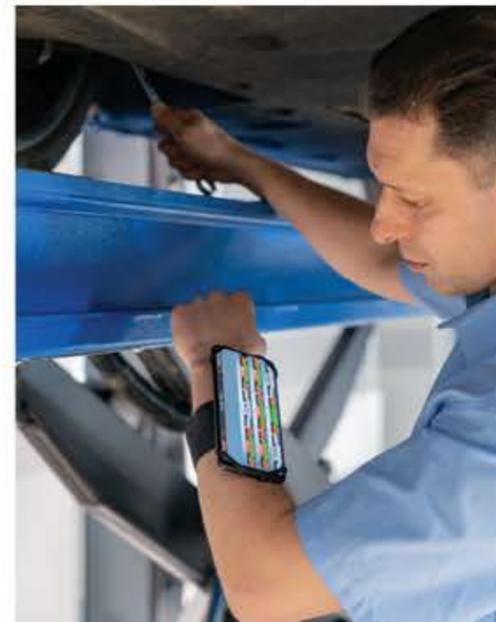

\* - requires an AutoFill package

#### Optional equipment

#### Additional camera

- Provides drive-in assistance
- Provides license plate recognition
- Provides vehicle presence tracking
- Allows to attach photos to the order

### Order AutoCompletion packages

#### AutoFill package\* features:

- License plate recognition
- If the vehicle is present in the customer's local database (returning customer), the vehicle model and the customer information is filled automatically

\* - internet connection is required

#### AutoFill Plus package\* features:

- License plate recognition\*
- If the vehicle is present in the customer's local database (returning customer), the vehicle model and the customer information is filled automatically
- Uses TechnoVector online services\*\* to determine the vehicle's make model and other information about the vehicle based on its license plate number\*\*\*

\* - internet connection is required

\*\* - per-country availability can be checked on technovector.com

\*\*\* - information details vary depending on the country
