

PRODUCT DATA SHEET

BM4010 Test Line

The BM4010 test line is a strong and reliable in-ground test line for testing of light vehicles.

The BM4010 test line consists of one or more of the following equipment designing a customized test line:

- BM4010 roller brake tester
- BM40010 suspension tester
- BM810 side slip tester
- BM305 tachometer tester

All equipment will be controlled from one embedded electronics; the X010 system.

The equipment features a large range of options, that allows for a customized configuration.

OPTIONS

READ MORE ABOUT THE EQUIPMENT:

BM4010 roller brake tester

BM40010 suspension tester

BM305 tachometer tester

See also other BM test lines for light vehicles: BM3010 test line and BM9010 test line.

Advantages

PRODUCT DATA SHEET

- IT system using latest app technology for smartphone and tablet (Windows and Android).
- Optional split bed installation over an inspection pit.
- The display can be mounted either on the wall, saving floor space, or on floor column devices, that are designed so equipment is protected even when floor is cleaned with chemicals. It can also be mounted on a trolley making it easy to move around.

Installation

- Hot galvanized subframes can be concreted into the ground before the actual equipment is installed.
- The subframes ensures easier planning and implementation of installation as well as correct alignment of the equipment during concreting.

Applications

- Private workshops.

PRODUCT DATA SHEET

- Vehicle inspection bodies.
