

Wälivaara OM Steel string

OM stands for "orchestra model" and was originally a larger sized guitar for strong projection on stage to measure up with the contemporary louder brass ensembles. Since the introduction of the large Dreadnaught model, the OM is nowadays of less stature and considered as the finger pickers top choice. The OM model has grown tremendously in popularity during the last years due to its articulate yet powerful voice, its attractive size and comfortable playing,

OM Steel string with optional cutaway, shellac coating, abalone body trimming and star inlays on fretboard with purfling

Optional Florentine cutaway with abalone trimming around body rim

X-type bracing pattern (spruce)

Bolt joint "double tenon" superior acoustic coupling, and ensure that fretboard stays straight
