We would like to share some practical information with you:

- NM will be judged by the Nordic rules and regulations found at www.farrierportal.com under "Documents".
- When you arrive at the venue you should register and get your T-shirt and name tag for your anvil.
- There have been added 5 minutes for the shoeing classes of division 1 and 2 for drilling and tapping of the shoes. They will be drilled after they have been judged. The floor staff will take care of it, but the striker or competitor must make sure they have been drilled and tapped before nailing the shoe on. If you like you can mark the shoe on the foot surface with a center mark where you want the holes to be placed. There will be 4 holes in each shoe.
- Striker is allowed in all classes including the final. That means if you have a striker also competing in the same division you must sort a new striker for the final if you both make it to the finals.
- Please make sure the tools are set up and ready, without any damages or over-hanging edges. This is to prevent them from splinting. There will be possible to grind off edges at the arena.
- The shoes shall be cool at the end of the class and placed in the bucket with the same number as your anvil. It is your responsibility as a competitor to make sure of that.
- There is a limited amount of time in between classes and heats. Therefore we can only allow the next competitor and his/hers striker in to the arena after one class is finished. This is of respect for the competitor recently finished, to make sure he/her gets to pack up and for the next to be able to set up their working station efficiently.
- It's possible to store tools inside the arena overnight, at your own responsibility. It will be locked.
- Parking at designated space.

If you are new and or and travelling alone, please don't hesitate to contact us for any further information or questions! We can be reached at
