The diagram features a central 3D perspective of a roll of artificial grass. Green arrows point from various text labels to specific parts of the roll: the stem texture, the material, the water permeability, the UV stability, the total weight, and the back carrier. A sun icon is positioned near the UV stability label. On the right side, a vertical ruler with markings from 1 to 6 cm is shown, with a green silhouette of a grass blade indicating a height of 25 mm. At the bottom, a green box contains information about available lengths and widths, accompanied by a target icon. A disclaimer is located at the very bottom of the diagram area.
