

IPUR AB

INNOVATIVE POLYURETHANE

OPERATIONS POLICY

IPUR AB is a company focused on continuous development and places great value on integrating environmental considerations into all aspects of the business.

This policy shall serve as the foundation of our work towards long-term sustainable development.

- We will carefully harness and develop the commitment, awareness, and knowledge within the company to improve our environmental and quality efforts.
- Protect our environment, actively prevent pollution, and comply with laws and other requirements, ensuring they serve as a minimum standard.
- Actively work on continuous improvements in our operations and management system.
- The business shall be permeated by awareness of the Earth's limited resources and the importance of maintaining a circular flow from raw material to product and eventually new resources.
- We will prevent pollution and reduce waste that may arise in the operations.
- Through quality, we aim to be perceived as a good supplier and partner.
- We place the customer at the center and work to complete assignments thoroughly.
- We will actively participate in business development projects through participation and membership in industry organizations.
- We will continue to develop polyurethane.
