

**PT. BUDI MAKMUR JAYAMURNI LEATHER TANNERY &  
EXPORTER OF FINISHED LEATHER FROM SHEEP & GOAT  
SKIN YOGYAKARTA, INDONESIA**

# Commitment to technical innovation

## 1. Overview of operation

The tannery commenced production in 1966 producing Sheep & Goat pickle & wet blue and exported its product to Japan & Europe.

Our president director Sutanto Haryono, Mr

In 1971 start producing finished skins , mainly cabretta & drum dyed lamb skin.

In 1979 PT Budi Makmur Jayamurni expanded by acquiring 30,000 square meters of land close to the old factory.

Our monthly capacity amounts to 1,200,000 square feet in sheep & goat skin for various type of finished products.

The growing popularity & interest in playing Golf, has arouse the people to build glove factories and automatically leather tanneries were required, to supply the leather for the gloves manufacturers.

- Pt Budi Makmur play an important role to be one of the best & well known tannery for supplying leather, not only for gloves, but for shoes upper and garment leather for export and import.
- The gloves sold in United States, are mostly made in Indonesia and leather from PT. Budi Makmur share a majority portion of the total supply.

# Our Vision

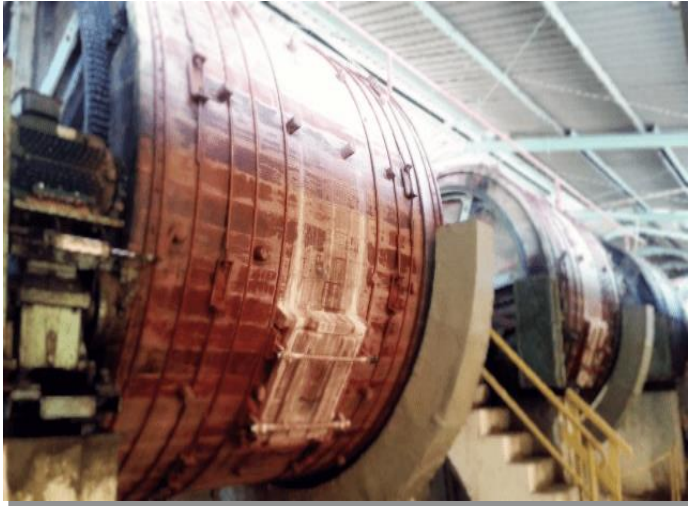

- Continuous effort & progress to produce leather with satisfactory quality.
- Satisfy customer request.
- Competitive in international market.
- Environmental friendly.
- Produces according to the management system of ISO 9001:2000.

# Commitment to Environmental Best Practice

- ◎ Water treatment
- ◎ PT. Budi Makmur Jayamurni was the first tannery in Indonesia to install Water Effluent plant, long before the government passed the law that made the treatment of waste water compulsory. Our Water Effluent plant was install in 1986 and is the product of Japanese technology .
  - ✓ Wastewater treatment process consists of the physical, chemical, and biological processes.
  - ✓ The main water supply is provided by boreholes, then stored in an underground tank, that used also to keep rain water.
  - ✓ After undergoing several effluent treatment procedure the clear effluent was discharge to the river running along side the tannery.

## ○ **Commitment to Employees**

- The company's management always give priority to the workers need by providing health insurance known as BPJS, medical care, etc for its 250 employee.
- Many activities held by PT. Budi Makmur to create familiarity relationships between employees ,about 20% are women.
- Budi Makmur actively supports a range of sport activities among its workers, badminton indoor and 11-a-side football are all popular.
- Cooperation system, known in Indonesia as 'Koperasi', to help workers in financial aid with soft loan.

# Commitment to the community

- PT.Budi Makmur apart from being leather Tannery & supplier, is also able to provide livelihood for many communities.
- The tannery is located near the river & within the residential area, thus tannery have to maintain high regard for the near neighbour, and create jobs for local people. Almost about 30% of Budi Makmur employee are from the surrounding area.
- Several activities were held to create good relationship.
- Donations were given for social activities whenever necessary.

# **Commitment to Strong Relationships With Clients**

- 
- The growing popularity & interest in playing Golf, has arouse the people to build glove factories.and automatically leather tanneries were required, to supply the leather for the gloves manufacturers.
  - Pt Budi Makmur play an important role to be one of the best & well known tannery for supplying leather, not only for gloves, but for shoes upper and garment leather for export and import.
  - The gloves sold in United States, are mostly made in Indonesia and leather from PT. Budi Makmur share a majority portion of the total supply.

# Commitment to Economic Sustainability

- Collecting and preserving these small skins across a country of 17,500 islands is a capital-intensive business and is in the control of a handful of family firms—now being run by members of their second or third generations—who are strong and experienced enough to carry out the work and make a living, even though the margins are not enormous
- We import material too, directly from the Middle East. This helps stabilize prices

# **Commitment to economic sustainability**

Presently the President Director Mr Sutanto Haryono , son of the company's founder, follows the tradition started by his predecessor. our monthly capacity amounts to 1,200,000 square feet. The volume of our production , in conjunction with the high quality , makes PT Budi Makmur as the most important tannery in Indonesia.

PT Budi Makmur is always aware of the latest tendencies & adjusts its production to them, observes the evolution in fashion tendencies , so that the company can update its offer and satisfyingly serve the most demanding markets.

# Commitment to Economic Sustainability

Our team of experts travel to most important leather fairs : Hong kong, Beijing / Shangai fairs, Lineapelle, Semaine du Cuir, to show the awareness of the latest international tendencies.

More than 30 % of all Leather exports in Indonesia are made by PT Budi Makmur Jayamurni.

We export to Europe ; Italy, Germany, Holland & United Kingdom, and in the Far East to Hong Kong, Korea, China, Japan, Singapore, Malaysia, Taiwan, Vietnam, Thailand & India.
