

OUR PROFILE

Bionic Farm was established in 1990 by our founder, Dra. Imelda Rimba, starting from her passion for organic farming. In 2008, PT. Bionic Natura was founded as a manufacturing food company and the focus of our products are natural, healthy and functional-food products. In line with our principle of promoting natural and healthy lifestyle, we farm and source our products and ingredients which are free from harmful chemical additives and flavorings.

OUR VISION

We envision a world in which health and well-being of our society and environment are not at risk from exposure from pesticides and other toxic chemicals. This vision also includes preservation and protection of our nature and save our Mother Earth for future generations.

OUR MISSION

We are committed to building a vibrant, healthier society by providing natural and healthy products. This mission arises from underlying concern for our society especially children for their sustained health.

We believe that by implementing small fundamental changes in our daily intake will have large impact on the well-being, as the saying goes "healthy body, healthy mind".

OUR SPECIALITY

We specialized in producing and developing natural, healthy and organic based products and functional food. Our farms are already certified organic by INOFICE (Indonesian Organic Farming Certification) and we also source the ingredients according to our principle by keeping them organic.

Our company provides contract manufacturing services and custom the products according to customer's specifications.

In line with our principle in producing healthy food, we equipped our factory with the latest technology and in the process of BRC (British Retail Consortium) certification.
