Initially established in 2019, CV Langit Karya Tadulako is a trader and consumer of coconut products. Driven by market developments and the increasing demand for coconut-derived products, we began to focus on one product, namely Virgin Coconut Oil (VCO).

According to local demand for products, we strive to provide guaranteed high quality and competitive prices. In ensuring quality, we strive to improve our products through a rigorous research and development program, with full supervision from harvesting, VCO extraction, to packaging. The factory location is in Batui, Kec. Luwuk, Banggai. Currently, the production capacity reaches 6 tons per month.

Besides VCO, we also produce Coco Fiber and coco peat. Even if in a different place. We believe that the coconut product market is in great demand in the global market. The factory location is in Labuan Village, Donggala. Currently, Coco Fiber's production capacity reaches 150 tons per month and Cocopeat Block production capacity reaches 200 tons per month.

# OUR PRODUCT

The final product of VCO is obtained from a combination of sorting fresh coconuts and the extraction process (purification centrifugal). From here, the highest quality VCO products are obtained.

The resulting VCO does not go through a heating process, so it has advantages such as water content, free fatty acid content, and low viscosity. This VCO also has a high level of clarity.

In addition, the nutritional content in VCO is also well maintained due to natural processing methods and has a longer expiration date even without preservatives.

Furthermore, the other coconut product comes from coconut coir. This product is called Coco Fiber. Coco Fiber is widely used for industrial carpets, sofas, upholstery in various countries. We are very grateful that our country has abundant coconuts.

Coconut Product Next is Coco Peat, where cocopeat itself is a waste of coco fiber. Usually Cocopeat is the target of plant lovers, Highly recommended for use in growing media because it has high water absorption. Our Factory produce cocopeat bulk and block, with large capacity.

# ***VISION AND MISSION***

## **VISION**

To become the world's leading Coconut Company known for its quality products and brands, the latest innovations, and providing many benefits to society

## **MISSION**

Connect and positively influence consumers by providing what nature has to offer. It also improves the welfare of the surrounding farming community by involving them directly and breaking the distribution chain.

# RETAIL BRAND

The majority of VCO production in Indonesia uses conventional fermentation and centrifugal methods which produce relatively low quality products. We are one of the few VCO producers that use the centrifugal purification method. This method is able to maintain the quality of VCO and can still be marketed at an affordable price.

Recognizing the enormous benefits of VCO in everyday life, we see that there is a huge opportunity in this market. With experience in VCO production, We have a retail brand to increase people's trust.

Therefore, we continue to strive to provide the best quality.
