About us

Agroshine Indonesia is a trading company engaged in agriculture, established in 2021, currently we are starting our initial focus on the manufacture of coconut products, namely cocopeat and cocofiber. Located in the fertile land of Indonesia and standing and collaborating with farmers, we process the best quality coconut waste for our manufacturing products (cocopeat and cocofiber). At the same time, we are also reaching out to potential areas around us by establishing partnerships with local farmers to revive the glory of quality Indonesian spices.

Product Specification

Volume (+/-) : 95 x 75 x 45

Condition & Colour : Clean, Dried, Bright Brown

Packing : 90-100 Kg (Up) /Bale

Moisture : <20%

Container Loadability

17 MT (-/+) /40 ft

11 MT (-/+) /20 ft

Our Products Detail

Cocopeat Polybag

Cocopeat is the most preferred planting medium by farmers, besides being economical, cocopeat is an environmentally friendly planting medium because it is made from coconut shells which are organic or biodegradable. Coconut Peat Polybag the difference with Coconut Peat Block lies in the water content which is still high and does not use a press.

Size	30cmx40cmx70cm±5cm
Weight	30Kg~32Kg
Compression Ratio	2 : 1
High EC	>1mS/cm
Low EC	<0.5ms/cm
PH	5.2 to 6.8
Expansion	200 liters
Moisture	40%
Load Ability	24 MT in 40HC
No. of Bags	750 bags in 40'HC
Drying	Sun Drying

Our Products Detail

Lalpari Cloves

Indonesia is the largest clove producing country in the world. From ancient times until now, cloves, an Indonesian spice, have been one of the most popular commodities in the world market. Not only meeting domestic needs, cloves are also a commodity that dominates Indonesia's exports.

Indonesia being the largest clove-exporting country, ranks second after Madagascar. As a tropical country and the origin of cloves, Indonesia has a high potential for clove production. This plant is widely distributed both in yards and plantations in almost all regions.

Cloves are the aromatic flower buds of a tree in the Myrtaceae family, with the scientific name *Syzygium aromaticum*. Cloves are widely used as a spice in cooking because of their distinctive aroma and taste. Cloves are used in the cuisine of Asian, African, Mediterranean, and the Near and Middle East countries, lending flavor to meats, curries, and marinades, as well as fruit (such as apples, pears, and rhubarb). Besides being used as a cooking spice, cloves also have benefits for the health of the body.

Eco-friendly

www.agro-shine.com

Indonesia is one of the largest coconut producers in the world, Indonesian coconut provides a variety of needs for domestic and international coconut manufacturing products. Of course, coconut processing activities cannot be separated from coconut waste itself, one of which is coconut fiber, in some areas of Indonesia there are still many who throw away and burn coconut fibers just like that, with a lack of knowledge for the utilization of this waste, resulting in a lot of business potential and the use of natural resources just wasted. With this case, we are challenged to continue to develop and educate the added value of coconut fiber by carrying out an environmentally friendly concept, so that Indonesia is increasingly becoming a trusted country regarding coconut. Together with Agroshine Indonesia, we and you can contribute to the welfare of farmers and a better eco-friendly concept.
