# Product Specification

The most widely distributed *Orthosiphon Aristatus* on the island of Java are *O. aristatus*, *O. thymiflorus*, and *O. petiolaris*. This plant is also known as kidney tea plant or java tea (English). *Orthosiphon Aristatus* is a medicinal plant with wet and upright trunks. *Orthosiphon Aristatus* leaves can be processed using dry leaves (simplicia) which are useful for launching urine metabolism (diuretic), healing coughs, gout, colds, and constipation. In addition, the leaves of this plant are also useful for the treatment of kidney inflammation, kidney stones, diabetes, albuminaria, and syphilis.
