Coffeebean Universe

**Selling the greatest
taste of coffee product**
from high land paradise
across the world

We do not claim that our coffee have best taste because we know that every coffee around the world has their own taste. But we believe that our coffee have high quality and unique taste.

We collaborate with coffee farmers and experter near Mount Ijen and Mount Raung that planted at an altitude of +/-1500 masl to sell our unique taste of coffee around the world. We start production from picking coffee cherries that have turned red. Then post-harvest treatment is carried out carefully and monitored by people who are competent to produce green bean coffee with a unique taste.

1**About Us**

2 Our **Commitment**

We will continue to give the best serve to our customers and investors all the time and become company that has positive impact on the surrounding environment, economy, social and sustainable industry.

3

Our Vision

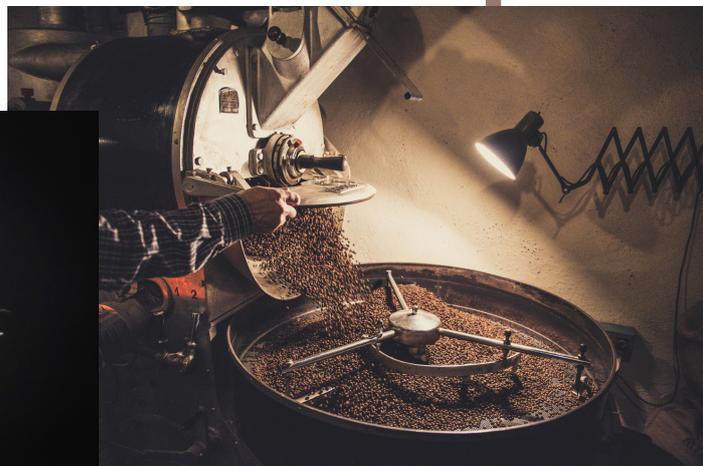

To become a leading company that produces coffee products with integrity and able to give positive impacts on the surrounding environment, economy, social and industry in a sustainable manner.

- **Increase local and global market share**
- **provide only high quality of coffee product**
- **sustainability commitments across all operating systems**
- **collaborate with many surrounding parties, especially coffee farmers and local governments**

4 **Our Missions**

5 Our Customer

We focus on supplying coffee roastery businesses, traders, and food and/or beverage companies that require large capacity green beans coffee.

Capacity for Industrial Supplies
Green bean : 36 tons per Month

Supplies

Catalog

Arabica Java

Characteristically slight herbs aroma with medium consistency, medium acidity and balanced taste. Planted at the altitude 1000-1500 masl. Moisture content maximum about 12%. Semi-wash, full-wash or Natural post-harvest process.

Robusta Java

Has a thick firm taste of bitter caffeine. Planted around Mount Ijen & Raung. Moisture content maximum about 12%. Semi-wash, full wash, or Natural post-harvest process.

Luwak Coffee

fermented by chemical treatments into luwak's stomach. The flavour mainly defined in terms of earthy and musty with hints of caramel and chocolate.

Cascara

looks similar to loose leaf tea, but the cherry remnants are slightly larger. It tastes somewhere between coffee and tea. Although it comes from a coffee tree, it doesn't have the same taste as the coffee bean it grows with.
