For providing the best products, we collaborate with best crafter community who have various excellence product which has been tested the quality.

II. Vission & Mission

Vission : Expand market segmentation through best quality handicraft products.

Mission : Supplying handicrafts for various needs at competitive prices and product quality to be reckoned with, as well as creating job opportunities for the surrounding community.

III. Product Material

1. Sea grass

As we all know, Indonesia is the second country with the longest coastline in the world. The way of making it is no different from making woven cloth from yarn. However, before being spun into yarn, the grass roots must go through a processing process first.

Firstly, the grass roots must be selected that are good or not brittle. After that, the grass roots will undergo a coloring process. Before spinning it must be dried first.

2. Water Hyacinth

Water hyacinth is a fast-spreading plant known as a weed that can destroy the aquatic environment. The negative impact of this plant is reducing the volume of oxygen in the water, sedimentation, reducing the amount of water, disturbing traffic in the waters, and others.

With regard to that matter, we maximize water hyacinth into something useful and valuable. One of them makes it as a handicraft material.

3. Rattan

The greatness of rattan is not only flexible, strong, and easy to shape properties. Rattan material is also included in the basic material which is cheap, but has a high aesthetic value.

4. Bamboo

Since ancient times, the ancestors of the Indonesian people have used bamboo in their daily lives. Starting from housing, cooking, eating, building, even used as weapons to repel invaders.

One of the uses of bamboo that is still used today is handicrafts. There are many types and kinds of bamboo crafts in Indonesia. Each region has its own type of the handicrafts.

IV. Product Price

The price is started from 3 USD according the item and variations.

V. Addition Facility
