## VISION AND MISSION

### Vision

To become a supplier of dried taro leaves both on a nationally and internationally by prioritizing the best quality, providing professional services for customer satisfaction.

### Mission

1. Improve product quality with the latest innovations.
2. Expanding a bigger market, both local and international markets.
3. improve relationships with business partners and a good social environment.
4. improve the quality of human resources within the company.
5. provide product satisfaction for consumers.

We are a company that specializes in the production of dried chopped taro leaves. Our company was founded on April 4th, 2021 in Indonesia, initially our company supplied a local company that had traded between countries, the results of our products were taken and collected by other companies for export through that company.

According to the company's development, we have been able to produce 5 tons of dried chopped taro leaves per month. With our ability and experience in the field of dried chopped taro leaves production, we very confident and believe that our products can be accepted in export destination countries.

Our company Serves dried chopped taro leaves through a maximal and hygienic drying process so that it is safe, dried taro material comes from nature which is free from chemicals and 100% organic and free from nicotine content, so it is safe for human consumption. There are 2 types of taro leaves that we produce which are our mainstay, namely taro kajar and taro beneng. According to our company's experience and capabilities, we can suplay dried chopped taro leaves for your company's industrial needs.

Drying chopped taro leaves using sunlight and always keeping hygienic

The process of collecting taro leaves that are still green and fresh is obtained through the harvesting process from the farmers' plantations

Dried taro leaves that have gone through the drying process, are stored and kept moist to keep them fresh and have a distinctive smell

Treatment of taro leaves by incubating for 2-3 days so that the color of the leaves turns golden yellow

Dried Chopped taro leaves that are ready to be sold to consumers
