#### **Coffee Product**

### Sumatra Coffee

#### Arabica Mandheling

#### Robusta Lampung

Some of the world's best tasting premium gourmet coffees are Mandheling, Ankola, and Lintong grown in Sumatra. These coffees are distinguished by their full body, more earthy flavours than Java Arabica, distinct herbal tones, and with a low acidity. This low acidity makes them particularly attractive for people who have a sensitivity to the otherwise healthy organic acids in coffee. Sumatran coffees are well reviewed and renown world-wide for providing a rich, satisfying flavor, though this can be overwhelming for the uninitiated.

Origin ;	North Sumatra, Sumbul, Saribu, Dolok
Туре :	Non-Organic
Type Beans :	Green Bean, Roasted Bean & Ground Bean
Process :	Full Wash, Natural & Semi Wash
Shelf Life :	- Green beans : 1 tahun - Roasted beans : 6-9 bulan - Ground beans : +- 5bulan

Coffee

#### **Coffee Product**

The finest Java coffee comes from plantations on the five largest estates established by the Dutch government in the 18th century when Java was part of the Dutch East Indies. The largest coffee estates on Java, encompassing more than 4, 000 hectares of coffee plantings, are Djampit, (the biggest producer) Blawan, Pancoer, and Kayumas. Coffee has been growing in this area since the 17th century and has historically been enjoyed by people all around the world. After harvest the coffee fruit (cherry) is fermented and washed using the wet-process, which removes the pulp.

#### Anniversary date: 14 March 2022

Control Union Certifications declares to have inspected the unit(s), and/or product(s) of the above mentioned client, and have found them in accordance with the standards mentioned above. Once certified, a production or handling operation's organic certification continues in effect until surrendered, suspended or revoked. Anniversary date - when the certified operation must submit its annual update.

#### **Tea Products**

Green tea is a type of tea that is made from Camellia sinensis leaves and buds that have not undergone the same withering and oxidation process used to make oolong teas and black teas. Green tea originated in China, and since then its production and manufacture has spread to other countries in East Asia.

Several varieties of green tea exist, which differ substantially based on the variety of C. sinensis used, growing conditions, horticultural methods, production processing, and time of harvest. Although there has been considerable research on the possible health effects of consuming green tea regularly, there is little evidence that drinking green tea has any effects on health.

## Green Tea

## Green Tea 🥤

### Super Pekoe

Size :	Through shifter diameter 8 mm and stopped shifter diameter 6 mm
Appearance :	- Green bright / green liquor - Infusion = green, bright, even and aroma
Density :	Fallen : 395 - 405 cc per 100 gram sample Shaken : 355 – 365 cc per 100 gram sample
Moisture Content :	7% maximum at point of packing

Origin :	West Java
Shelf Life :	1 year
Packaging :	Packing with Paper Sack 50kg
Capacity :	4.000 MT
Taste :	Thick mild astringent, fresh, smoky green tea character.

### Fannings

Size :	Through shifter diameter 1,5 mm and stopped shifter diameter 1 mm
Appearance :	- Pale yellow / green clear liquor - Infusion = green, bright, even and aroma
Density :	Fallen : 255 - 265 cc per 100 gram sample Shaken : 235 – 245 cc per 100 gram sample
Moisture Content :	7% maximum at point of packing

Origin :	West Java
Shelf Life :	1 year
Packaging :	Packing with Paper Sack 55kg
Capacity :	4.000 MT
Taste :	Light smoky taste with mild astringency.

#### Green Tea

### Gun Powder

Origin :	West Java
Shelf Life :	1 year
Packaging :	Packing with Paper Sack 60kg
Capacity :	4.000 MT
Taste :	Mild taste with fresh, smoky green tea character.

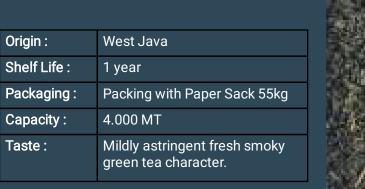

Size :	Through shifter diameter 6 mm and stopped shifter diameter 5 mm
Appearance :	- Pale yellow/green liquor. - Infusion = green, bright, even and aroma
Density :	Fallen : 265 - 275 cc per 100 gram sample Shaken : 245 – 255 cc per 100 gram sample
Moisture Content :	7% maximum at point of packing

#### Green Tea

#### Cun Mee

Size :	Through shifter diameter 5 mm and stopped shifter diameter 3 mm
Appearance :	- Pale yellow / green liquor - Infusion = green, bright, even and aroma
Density :	Fallen : 235 - 245 cc per 100 gram sample Shaken : 225 – 235 cc per 100 gram sample
Moisture Content :	7% maximum at point of packing

#### Green Tea

### Broken Tea (BT)

Size :	Through shifter diameter 5 mm and stopped shifter diameter 2 mm
Appearance :	- Pale yellow/green clear liquor - Infusion = green, bright, even and aroma
Density :	Fallen : 365 - 395 cc per 100 gram sample Shaken : 335 – 345 cc per 100 gram sample
Moisture Content :	7% maximum at point of packing

astringency.

### Green Tea

Origin :	West Java
Shelf Life :	1 year
Packaging :	Packing with Paper Sack 60kg
Capacity :	4.000 MT
Taste :	Mildly astringent fresh smoky green tea character.

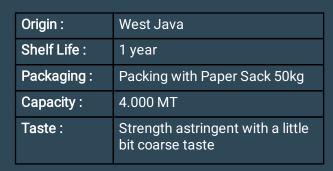

Dust

Size :	Through shifter diameter 5 mm and stopped shifter diameter 3 mm
Appearance :	- Pale yellow / green liquor - Infusion = green, bright, even and aroma
Density :	Fallen : 235 - 245 cc per 100 gram sample Shaken : 225 – 235 cc per 100 gram sample
Moisture Content :	7% maximum at point of packing

#### Green Tea

### Sow Mee

Size :	Passed through shifter 3.0 mm and stopped Flat Shifter
Appearance :	Green with some yellow leaves, some stalks, fairly even, flacky
Liquor :	Yellow coloury
Density :	Fallen : 280 - 320 cc per 100 gram sample Shaken : 240 – 280 cc per 100 gram sample
Moisture Content :	6 % maximum at point of packing

#### **Tea Products**

Black tea, also translated to red tea in various Asian languages, is a type of tea that is more oxidized than oolong, yellow, white and green teas. Black tea is generally stronger in flavour than other teas. All five types are made from leaves of the shrub (or small tree) Camellia sinensis, though Camellia taliensis is also rarely used.[2][3][4]

Two principal varieties of the species are used – the small-leaved Chinese variety plant (C. sinensis var. sinensis), used for most other types of teas, and the large-leaved Assamese plant (C. sinensis var. assamica), which was traditionally mainly used for black tea, although in recent years some green and white teas have been produced.

#### Black Tea

### Broken Orange Pekoe Fannings (BOPF)

Origin :	West Java
Shelf Life :	1 year
Packaging :	Packing with Paper Sack 50kg
Capacity :	1.500 MT
Taste :	Good Strength with Charateristic Flavour

Size :	Pass mess 16 size Hold mess 20 size
Appearance :	Blackish, Curly, Even, Clean.
Liquor :	Red and Coloury Bright
Density :	300 - 340 cc /100 gram.
Moisture Content :	4,5 - 5%
Dust Content	0,02 % Not More Than 0,05 %

### Black Tea

## Broken Tea (BT)

Origin :	West Java
Shelf Life :	1 year
Packaging :	Packing with Paper Sack 40kg
Capacity :	1.500 MT
Taste :	Good strength taste with aroma

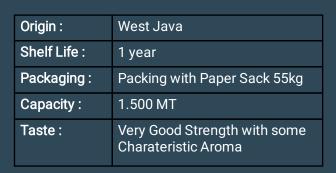

Size :	pass Shifter Mess 8, hold mess 16, and fall down in 3rd & 4th hole of winnower
Appearance :	Blackish, Flacky, Uneven, Clean of Stalks & Flber
Liquor :	Red bright
Density :	390 - 430 cc /100 gram Free Fall
Moisture Content :	4,5 - 5%
Dust Content	0,05 %

#### Black Tea

#### Pekoe Fannings (PF)

Size :	Pass mess 20 size Hold mess 24 size
Appearance :	Blackish, Curly, Clean, Even.
Liquor :	Coloury Bright
Density :	290 - 310 cc /100 gram Free Fall
Moisture Content :	4,5 - 5%
Dust Content	Not More Than 0,05 %

### Black Tea

Dust

Origin :	West Java
Shelf Life :	1 year
Packaging :	Packing with Paper Sack 60kg
Capacity :	1.500 MT
Taste :	Very good strength of taste

Size :	Pass mess 24 size Hold mess 30 size
Appearance :	Blackish, Grainy, Clean & Even.
Liquor :	Good coloury Bright
Density :	250 - 260 cc /100 gram Free Fall
Moisture Content :	4,5 - 5%
Dust Content	Not More Than 0,05 %
