NUSAVIA COCO

## COMPANY BACKGROUND

# Our History

**Nusavia Coco Is Trading Company with Committed To Supply The Needs Of Coconut Derivative Products Around The World. Made From Local Fresh Coconut To Proceed Coconut Products Which Has Many Top Value and Benefits For Our Consumers.**

## VISION

**Switch over global needs for healthier life option from the nature's best products, Coconut.**

## MISSION

**Introduce Indonesia's Best Coconut Products To The World Through Exports, And Establish Collaboration Not Only As Partners But We Want To Always Support All The Needs Of Our Consumers As A Family.**

# OUR PRODUCTS

# VIRGIN COCONUT OIL

**Virgin Coconut Oil** is a product with process adopted the Cold Pressed & Centrifugal method, which uses absolutely no heat in any stage of the process. This process utilizes modified and improved machines to meet the strict standard of extracting the purest **Virgin Coconut Oil**. The whole process takes less than 2 hours, which means that we manage to extract Virgin Coconut Oil without long exposure to air that may cause oxidation and spoilage of oil. This is how we produces the **high quality** of Virgin Coconut Oil.

## Product Specifications :

Moisture : 0,05%  
Free Fatty Acid : 0,49%  
Peroxide Value : 0,1722mEqO2/Kg  
Colour : Colorless  
Odor : Light Coconut Aroma  
Taste : Normal

# CRUDE COCONUT OIL

**Crude Coconut Oil** is a light yellow liquid and pure coconut oil from the processing copra which is extracted with technology processing. Oil extraction requires the use of pressure and heat. The purpose is to refine and eliminate impurities as well as contaminants. It is advisable to use Crude Coconut Oil only for external consumption. It could also be used as a cleaning solution and a sunscreen agent. It is, therefore, often used as raw resources for oleochemicals, soap production, shampoo, and cosmetic products.

## **Product Specifications :**

Free Fatty Acid, as Lauric	: 4.0% max.
Moisture & Volatile Matter	: 1.0% max.
Iodine Value (WIJS)	: 10.0% max.
Color, Lovibond 5.25" cell	: 12.0 Red max. 70.0 Yellow max.
Peroxide Value	: 2.0% max
Saponification Value	: 250.0 min.
Melting Point, °C	: 24.0-26.0
Appearance	: Golden Yellow
Odor	: Natural Coconut odor

# COCONUT FIBER/COCOFIBRE

**Coconut fiber** or coir is a product which is extracted from the outer shell of the coconut fruit. It is used in a variety of ways worldwide, being especially popular for rope and matting, and there are a number of sources for coir and coir products. Coir comes from a matted fibrous layer found between the inner and outer husks of the coconut. There are Two Types of coir Fibre. White coir Fibre and Brown Coir Fibre.

**Brown Coir Fiber** or Mattress Fibre is a natural fibre extracted from the husk of coconut and used in products such as floor mats, doormats, brushes, mattresses, etc. Technically, coir is the fibrous material found between the hard, internal shell and the outer coat of a coconut. Other uses of brown coir (made from ripe coconut) are in upholstery padding, sacking and horticulture.

## **Product Specifications :**

Moisture : 10-20%  
Leght : 12-35 cm  
Impurty : Aproximately 5%  
Weight : 100Kg/Bales  
Colour : Golden Brown  
Product Size (CM) : 120  
(hight)x100(leght)x27(wide)

# COCONUT CHARCOAL BRIQUETTES

We provide high quality **100% coconut charcoal briquettes** for use in shisha/hookah or for barbecue. Our coconut shell briquettes come in a variety of sizes and shapes. It contain low ash and high carbon content. They are long burning (**up to 2,5 hours**), produce **very little smoke**, have **white colored ash** and generate **zero odors**.

## Product Specifications :

Moisture : 7-10%  
Calories Value : Max 7000 kilo calories  
Ash Content : 2-5%  
Ash Colour : White Ash  
Fixed Carbon : 75-80%  
Material :  
100% Coconut Charcoal Briquettes  
80% Coco 20% Coco Granul Charcoal

Size :  
•A : 2.5 x 2.5 x 2.5 cm (can be customized)  
•B : 3.5 x 2.5 x 2.5 cm (can be customized)  
•C : 3 x 3 x 3 cm (can be customized)  
•D : 2.5 x 2.5 x 5 cm (can be customized)

# COCONUT MEAL/COPRA MEAL

**Copra meal or coconut meal** is produced from the ripe fruit (nut) of the coconut palm (*Cocos nucifera*). The nut is split and the kernel is removed and dried below 6% moisture. This meal is called copra meal and still contains the oil. Care is needed when feeding copra meal to livestock to ensure that it is not rancid, as this will cause diarrhea. Rancidity usually develops as a result of the meal being stored for too long under unfavourable conditions such as high temperature.

## **Product Specification :**

Moisture Content : 9,16%  
Protein Content : 19,04%  
Fat Total : 14,26%  
Colour : Brown
