Our Products

Organic Palm Sugar

Our Organic Palm Sugar is manufactured from the sugary fluid of the Arenga or Coconut Palm tree sap. It is a nutritious sweetener with a lower glycemic index than conventional cane sugar, a boost to the immune system, and the ability to balance cholesterol levels in the blood. It is also beneficial for the diet.

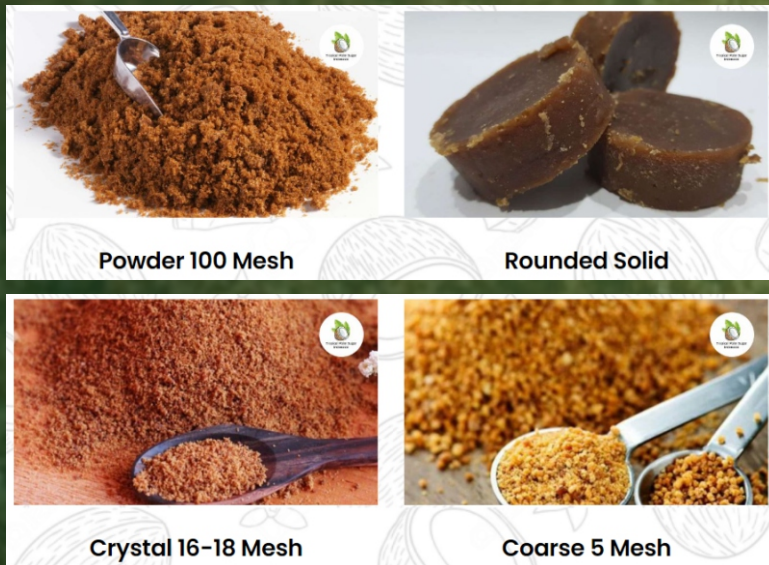

Organic Coconut Sugar

Organic Coconut sugar, which has a lower glycemic index and includes insulin to decrease glucose absorption, is a better option to natural sweeteners. Our Organic Coconut Sugar is prepared using a traditional technique that uses 100 percent organic coconut sap with no chemical additions.
