ORGANIC COCONUT SUGAR

www.bersamarajaabadi.com

COCONUT SUGAR

Coconut sugar is sugar made from coconut sap that has been filtered first, then boiled later. Coconut sugar is also called coconut palm sugar. It's a natural sugar made from coconut palm sap, which is the sugary circulating fluid of the coconut plant. It is often confused with palm sugar, which is similar but made from a different type of palm tree.

The low fructose content and low glycemic index levels make coconut sugar a better alternative sugar.

From a mineral perspective, this sugar is rich in minerals and antioxidants and has the same amount of carbohydrates as regular white sugar

The Benefit of Organic Coconut Sugar

- Low Glycemic Index
- Less Fructose
- Streamlining Blood Circulation
- Short-chain fatty acids
- Improves Bone Health
