ABOUT US

PT INDONESIA SUPPLY GROUP is one of the largest coconut shell briquette charcoal suppliers in Indonesia. We have just penetrated our product directly into the international market in 2019.

The high demand for coconut shell briquettes domestically has made us aware of the importance of maintaining the quality of our goods. The export market is our race to continue to develop and improve product quality.

Being one of the pioneers in supplying briquettes to foreign markets is one of our prides in improving the Indonesian charcoal industry and creating more jobs for the community.

OUR GOALS

1

We thrive to provide excellent services in exporting goods due to the high demand for Indonesian commodity.

As we value your trust, we will always examine the quality of our products regularly for our customer's satisfaction.

2

We strive to elevate Indonesian farmers lives by collaborating with them in most of our service.

OUR PARTNERS

In our business, we never call our workers employee. We call them partners. As our respect for them and equating workers with our other business partners. We realize how vital their role is for us in running this business. You can see our activities on our social media and the gallery provided on our site.

MAIN COMMODITIES BRIQUETTES

We produce coconut shell charcoal briquettes HS CODE (44022010) of various shapes and sizes. Such as hexagon, cube, and pillows. Moreover, you are able to request your own desirable shape and we could produce them for your needs. The price for 100% natural coconut charcoal briquettes for shisha in January 2023 starts from 995USD per ton on EXW basics with the minimum order of 18 tons or 20" ft container. Apart from coconut charcoal briquettes, we have started selling sawdust briquettes A, AB, BC or CD grade with HS CODE (44029000) to the international market as per 2021.

Our Coconut Charcoal Briquettes may remain hot for 2,5 – 3 hours, which is more durable than other regular coconut shell charcoal. Our briquettes specification is as follows

- Moisture 5 – 7%
- Ash Content 2,5 – 3%
- Fixed Carbon 79%

COCONUT CHARCOAL BRIQUETTE SHAPES

Cube Coconut Charcoal Briquette

Coconut shell briquettes in cubes are often used for Shisa or Hookahs. We provide between 2cm – 3.5 cm in size. Larger cube sizes are available only per customers' request after an agreement is made.

Hexagonal Coconut Charcoal Briquette

Often used for BBQ, Shisa or Hookah needs. The regular size we provide for hexagonal shape is 2 x 3 cm, but we are open arms for size requests.

Pillow Coconut Charcoal Briquette

Mostly used in the manufacture of coal briquettes, home barbecues and can also be used to burn stoves due to its resilience. They weigh 35 to 40 grams but requesting other size are welcome.

BRIQUETTES

WOOD PELLETS

The instability in coal prices encourages us to be creative to produce a new innovation that can replace the position of coal. One of the innovations that have been made is Wood Pellet HS CODE (44013100). Wood Pellet is a type of renewable alternative fuel that is much more environmentally friendly (Bioenergy).

Its shape is almost similar to Wood Briquettes, but the size and adhesive material are different. For household needs, Wood Pellets are often used as a heating fuel. Heating is indispensable for countries experiencing winter such as Korea, Japan, China, and various countries on the European Continent.

The price for Wood Pellet from Indonesia in December 2022 starts from 200 USD per ton on EXW basics with the minimum order of 18 tons or 20" ft container.

WOOD PELLETS

SUB COMMODITY

SAWDUST AND WOOD CHIPS

Sawdust and wood chips is not the main commodity we sell. However, we have the raw materials to make sawdust briquettes. If you wish to purchase sawdust briquettes and would see the quality of the sawdust we use before it, we are beyond pleased to send the sample for free to you.
