

We Bring Sangihe Island To The World

MESSAGE FROM CEO

As the company's Director, it is with great pride I present to you the first integrated coconut processing plant in Indonesia.

Our factory is located in Sangihe Island, North Sulawesi Province. It is the second largest coconut producing island in Indonesia.

Our mission is to produce and guarantee the best quality coconut products, and that is why our factory is mostly integrated with technologies and machineries in order to maintain our quality because customer's satisfaction is our top priority.

We are aiming to achieve performance excellence in regard to market share and profitability.

Last but not least, we want to improve the life of many people especially local people through job opportunities.

We strive to be the largest coconut processing plant in the world who came from this beautiful Sangihe island.

Best regards,

Nicholas Raharjo
CEO

Sangihe Island

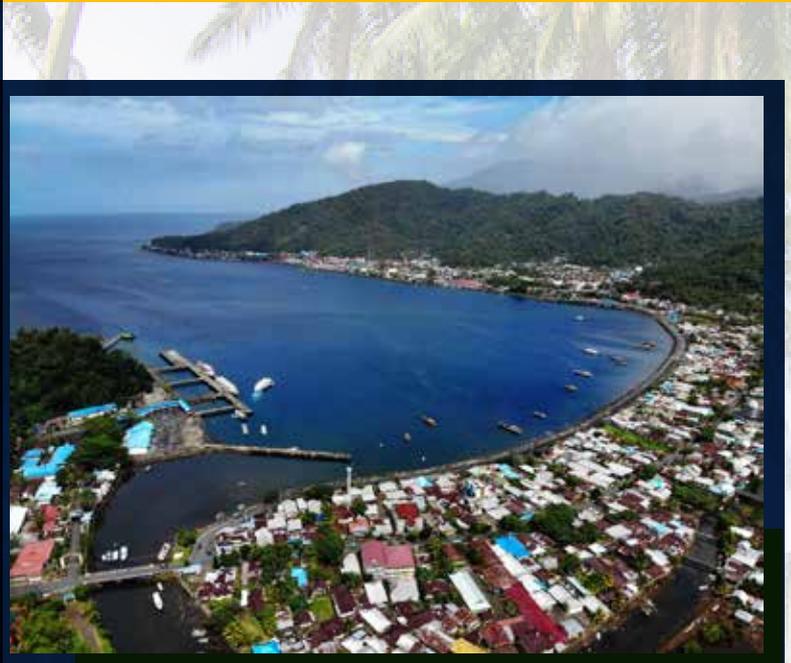

Sangihe island is a mountainous island rich with forests. The island is infested with wild coconut trees which locals call “Kelapa Dalam” which can grow up to 15 meters in height and bears fruit 3 times each year.

It is estimated that the island has over 6.000.000 coconut trees and bears almost 1.500.000.000 coconut fruits annually making it one of the largest coconut fruit producers in the country.

Sangihe is an island paradise located on the northern tip of Indonesia next to the Philippines

Size : 740 km²
Population : 130.000
Religion : Mixed, majority Christians
Major product : Coconut, Cloves, Fishery an Gold Mining

What Is Cocopeat

Cocopeat is a 100% natural growing medium made out of coconut husks

Advantage of Cocopeat :

1. 100% Organic and a renewable resource
2. Odorless
3. High water holding capacity, great absorption
4. Affordable and High quality

There are 2 types of Cocopeat :

1. High EC Cocopeat
Is used as animal bedding. It is ideal as bedding for as floor layer for animal sheds due to its moisture absorbing quality & soft bed cushioning effects. It can also prevents bad smells from animals pee and poop.
2. Low EC Cocopeat
Can be used as potting mix suppliers, Seedling nurseries, Lawn and golf course constructions, Horticulture and Floriculture applications, and Home gardening
