

COMPANY PROFILE

CLEAN GREETINGS,

In 1992, three family men (Mr. Paulus Goenawan Sijoatmodjo, SH, Mr. Hendra Trisno and Mr. Ir. Tjan Suwijanto) are very concerned about cleanliness for the health of their family. They built a cleaning equipment manufacturer that uses Indonesian natural raw materials such as cotton, palm trees (arenga pinnata), grass (sacharum spontaneum), coconut sticks and natural rubber. Plastic materials that we used are recycled and environmental friendly. We use the concept of reduce, reuse and recycle. We ❤️ green for the next life.

cotton tree for natural mop

coconut tree, coconut stick and coconut bristle for broom

Quality assurance and reliability are our priority. We always use the best selection of materials. Our skilled and trained employees are ready to give a touch of perfection to ensure the excellent quality of our product.

Water test to prevent mold growth

Insecticides the broom for killing insect

Arenga pinnata process production

Clamping the natural rubber to make it stronger and durable

So far we have produced more than 155 types of goods . Our main targets are Professional Cleaning Service, HoReCa (Hotel, Restaurant & Catering), Lawn & Gardening Store and Household Sepcialty Store. We are the first cleaning equipment manufacturer in Indonesia to adopt international cleaning color codes and international cleaning color codes for food industry (for our hygiene range brush).

Supported by professional management & good manufacturing process that guarantee for the best quality products, our brands have been accepted domestic and international.
