HI THERE!

Prima Jasa Boga Sentosa is a company that utilizes wasted by-production and converts it into eco-friendly energy, called biomass. We meet the world's needs and serve the world's best quality biomass. As time went by, we discovered that our main products could be used for Animal Bedding, and there are many advantages when using Rice Husk pellets for your beloved pet and husbandry. We also focus on helping the people of our country Indonesia, and our team will make our customers satisfied, trust, and comfortable.

EXECUTIVE SUMMARY

Energy prices have recently jumped dramatically. Especially when it comes to Oil, Gas, and coal, due to almost every country's policy to reduce pollution, renewable, eco-friendly, and unlimited energy has become the most wanted commodities for some countries.

We are producing our main renewable, eco-friendly product with an unlimited energy supply called Rice Husk Pellets. As an alternative biomass energy, pellets from Rice Husk may have a lower calorific value than any wood. But here is the thing ;

1. We can ensure you that our raw material is unlimited. The correlation with the eternal raw materials is that we can provide a stable price and supply in the long term if your company wants to cooperate with us.
2. For us, a high-calorie is not that influential. Suppose you have a high-calorie product but need to ensure the supply in the long run. It will be challenging if the suppliers cannot fulfill the inquiry. As business owners, we want our businesses to run as long as possible.

As time passed, we discovered that our main products could be used for Animal Bedding, and there are many advantages when using Rice Husk pellets for your beloved pet or husbandry. We also focus on helping the people of our country Indonesia, and our team will make our customers satisfied, trust, and comfortable.

INTRODUCTION

BIOMASS

Consumption of fossil fuels worldwide has increased tremendously in the last few decades, which has led to several environmental issues. Moreover, the fluctuation of fossil fuel prices and the depletion of fossil resources have shadowed the global economy, making the production of carbon-neutral and low-emission fuels from renewable resources, such as biomass, of growing importance in the gradual substitution of conventional fossils.

ANIMAL BEDDING

The housing system and resting surface influence milk yield and reproductive performance as much as feeding and keeping methods in the dairy herd. Proper bedding and flooring provide a soft area for animals to lay for rest and **help to improve their productivity and reproductive performance**. Dairy cows prioritize resting over other behaviors, and cows deprived of lying show behavioral and physiological disorders (Munksgaard and Thomsen, 2012).

Rice Husk Pellet is a solution when we compare it with other animal bedding, pellets show a better adsorbing performance which can adsorb the animal excrement, and lower the ammonia gas in the stable to keep the stable clean and dry. (Click [here](#) to learn more about Animal Bedding)

TARGET MARKET

BIOMASS

- Heating companies
- Home Use for Heating their houses
- Home and Industrial Boiler
- Biomass Power Plant Companies
- Countries that experience winters and need alternatives resource to replace gas & electricity

ANIMAL BEDDING

- Animal Husbandry Companies
- Animal feed & Feed additives companies
- Dairy Farmers

OUR CATALOG

RICE HUSK PELLETT

A Rice husk pellet is a kind of biomass material pellet. It is made of rice husk or rice hull, the outer layer of the paddy grain.

Production Capacity : Up to 5000 MT/ Month

[Click here to learn more.](#)

EXWORK PRICE PER METRIC TON :

\$102

RICE HULL

Rice hulls (or rice husks) are the hard protecting coverings of grains of rice. In addition to protecting rice during the growing season, rice hulls can be put to use as a building material, fertilizer, insulation material, or fuel. Rice hulls are part of the chaff of the rice. EXWORK PRICE PER METRIC TON :

\$32

OUR SERVICE

REPACKING

We help customers package and repackage material from bulk into customized smaller packaging using our multiple pieces of packing equipment. We work closely with customers to develop catered solutions to their repacking needs. Our systems can handle various super sacks of feed product at a time and can repack down to bags as small as 10 lbs. Our approach is automated for repackaging bulk products and has fully customizable load cells that allow it to fill finished packaging to any desired weight. We also help companies with packaging in smaller containers that need to be reformatted for bulk packaging.

REBRANDING

We can provide custom labels for clients and we also label products using specific labels sent from the customer. We have multiple automated shrink-wrapping machines on site as well to ensure that everything being repackaged is shipped in the safest way possible.

BUYER TERMS
