# Our Profile

From our humble beginnings in 2009, Cellindo Sigmaperkasa has grown into a focused and specialised leader of thermal insulation manufacturing company, distributing our services throughout the world.

PT. Cellindo Sigmaperkasa is a leading manufacturer of Reflective Aluminium Foil Radiant Barrier for Roof Insulation and Vapour Barrier for Industrial & Residential building, FRP skylight and gutter for better energy efficiency, EPS panel/ PIR panel, Ducting system for lighter and more efficient HVAC system. As an international manufacturer with high quality products and services, we supply general trading

## High Technology

Cellindo Sigmaperkasa specialised in :

- Thermal Insulation Aluminium Foils
- Highly durable Fiber Reinforced Polymer Skylight
- Highly durable Fiber Reinforced Polymer Gutter
- Lightweighted and easy to install Polyisocyanurate/ PIR panles
- Polyisocyanurate/ PIR Air Condition Ducts

## Quality & Management

Our Quality Policy and Management System Consist of Commitments to :

- Compliance with all applicable laws and regulations
- Continous development and innovations
- Effective communication of quality objectives
- Caring for employees, customers, partners and other stakeholders
- Working closely with both customers and suppliers to achieve stated objectives
- Adopting forward-looking business decisions
- Training employees in quality management

# VISION

To Become preferential provider of process and manufacturing solutions for customers worldwide

# MISSION

- 01** Continue to provide high quality building material and thermal insulation by using the most advanced manufacturing technologies.
- 02** Maintain sustainable growth by continuous innovation, improvement in our manufacturing process and quality control and increasing efficiency and productivity
- 03** Provide our workspace with environment that stimulate innovation, teamwork and continuous learning and improvement

# Product Value

Every products manufactured by Cellindo Sigmaperkasa have exceptionally high quality and followed by high quality services. Cellindo Sigmaperkasa is committed to provide the global market with high quality and innovative products. The factory runs whit premium resources and continously monitored and supervised by engineers and scientists, using internasional standard of quality throughout the whole production process

Cellindo Sigmaperkasa product ranges are fully customised and ready for large quantity OEM Manufacturing. The standard range for our products is suitable for varieties of application, for example :

- Warehouse and Residential roof thermal insulation
- Partition walls thermal insulation
- Ceiling and Ducting thermal insulation
- Warehouse and/or factory skylights
- FRP wall cladding
- Warehouse and/or factory gutter system
- Polyisocyanurate exterior and partition wall
- Polyisocyanurate roofing
- Cleanroom and cold storage Polyisocyanurate wall
- Lightweight Polyisocyanurate ducting systems

# Facilities

Every Cellindo Sigmaperka's Facilities are using world-class standards for producing best, high quality aluminium foil heat barrier insulation products. In all of our facilities, every employees ensure the quality through continuous monitoring, integrated production systems, based on internasional standards and testing the finished products of any defects. Our manufacturing processes are based on green and eco-friendly standards, which ensures that waste management nd costs are closely controlled. To ensures that we deliver them to you right on time

Cellindo Sigmaperka production facility is located in Mojokerto, Indonesia. We serve overseas markets, therefore we worked to keep our facilities as sustainable and responsive to surrounding environments as possible. This means, minimalising the negative environmental and social impacts the facility might do. For example, by reducing energy consumption and use it more efficiency, while maximising the positive impact to our surroundings, from providing job opportunityand education, to supporting worthy causes such as schools and hospitals.

# Service

Maintaining quality that our clients deserved is the basic principal for our employes, supported by comprehensive Human Resources Service are here to assist you. Cellindo Sigmaperkasa mainly concerns in customers's satisfaction. Therefore, we always try to listen to client's field difficulties and provide the best solution.

"We are ready to ship to your country, with proper setups and packing for long distance shipping"

# Certifications

Our Working system accreditation and commitment to provide the best quality of products and services. To give our clients complete assurance and confidence in our company as long term partners. All products of Cellindo Sigmaperkasa have been fully certified by the marks of quality assurance. Providing you a worry-free guarantee of the products safety and quality

# Warranty

Our main selling point is our commitment to provide excellence in all aspects, products specifications, length and perfection in it's form.

Cellindo Sigmaperkasa only manufactures excellence. We provide warranty for our products to guarantee satisfaction for all of our customers, in the form of legalised certificate seal on it.

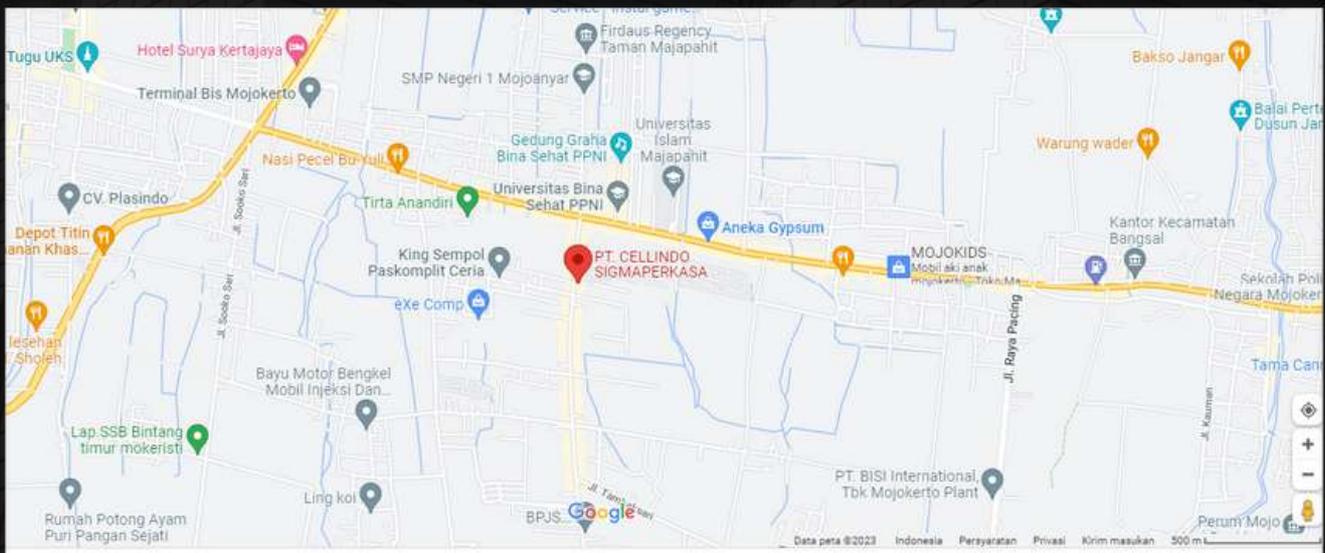

Dimensional testing - we use authentic and lasting hologram seal to mark end-to-end length of each insulation products and monitoring the process with the latest technologies and methods to verify that our hologram seal qualified for the task.

Functional testing - all of our products have been tested by industrial standard equipment, to ensures that all of our products meet the international standard quality and fully functional before it reaches or clients
