Sanofly

Building **pathways**  
toward a **sustainable** future

# OUR PURPOSE

---

At **Sanofly**, we believe that sustainability is key when facing serious challenges in the future. As such we direct all of our endeavors and strategy to involve economic activities geared towards reducing carbon emissions and pollution as well as resource efficiency. It is our aim to develop products and processes that contribute in reducing waste generation and resource consumption for the better of our planet and environment, to build pathways for upcoming generations.

# BLACK SOLDIER FLY

---

As part of our concrete initiative to reach our goal, we are focusing on **Black Soldier Fly Larvae (BSFL)** which are proven to be a high-quality and nutritious protein source for various lifeforms.

Furthermore, BSFL brings about enormous potential not only as a feed solution but also in waste management and composting abilities. Research has shown that BSFL farming is environmentally more effective compared to, for example, soy farming.

# WHAT WE DO

---

**BSF  
Cultivation**

**BSFL

# OUR PRODUCT

---

**Sano-GRUB** is a high-quality and nutrition-rich feed ingredient that are ready for animal consumption, produced from oven-dried Black Soldier Fly Larvae. All larvae are cultivated right in Indonesia, a suitable continent with great amount of sunlight, right climate to ensure the best temperature, and fed a diet composed of curated organic nourishment for best result.

# OUR PRODUCT

---

**Sano-Protein** is a high-quality, nutrition-rich and highly digestible feed ingredient produced from defatted Black Soldier Fly Larvae. It offers positive impacts for monogastric animals by providing essential macro and micro-nutrients needed in the diet. It also improves gut's microbial colonies by increasing the key bacteria that affect the animal's health. This microflora's stimulation also enables better digestion and utilization of nutrients, which in turn enhances growth.

# OUR PRODUCT

---

**Sano-Oil** is produced from oven dried larvae. It is mechanically extracted from Black Soldier Fly Larvae fed with quality nourishment resulting in a high content of essential medium-chain fatty acids (MCFAs) which are beneficial for animal health. This oil can be used in a variety of livestock, aquaculture, and pet manufactured feed products.

# OUR PRODUCT

---

**Sano-Frass** is the remains from cultivating Black Soldier Fly Larvae. It is rich in chitin which naturally boosts the defense mechanisms of plants. It is also loaded with beneficial micro-organisms that enhance soil fertility, structure, and boost microbial activities causing better plant health and nutrient-rich crops.
