## UNCARIA GAMBIER

Gambier extract is used or has been used as a catechu for chewing with areca and betel, for tanning and dyeing, and as herbal medicine. Gambier extract was also used by native people as a medical treatment or prevention of diseases that were believed to be spread by the now obsolete medical theory of miasma

## ARENGA PINNATA

Arenga pinnata (*Arenga saccharifera*) is an economically important feather palm native to tropical Asia, from eastern India east to Malaysia, Indonesia, and the Philippines in the east. [Common names include sugar palm, areng palm (also aren palm or arenga palm), black sugar palm, and kaong palm, among other names

## BETEL NUTS

Betel nut is the seed of the fruit of the areca palm. It is also known as areca nut. The common names, preparations and specific ingredients vary by cultural group and individuals who use it. Betel nut is a stimulant drug, which means it speeds up the messages travelling between the brain and the body

## CLOVES

Cloves (*Syzygium aromaticum*), tropical evergreen tree of the family Myrtaceae and its small reddish brown flower buds used as a spice. Cloves were important in the earliest spice trade and are believed to be indigenous to the Moluccas, or Spice Islands, of Indonesia. People have used cloves in cooking and traditional medicine for many years, but it is only recently that scientists have begun studying their potential health benefits.

## CANDLE NUTS

Also Known As : Kemiri, Candleberry, Indian walnut, kukui, Kukui nut. Candle-nut is actually a nut of a flowering tree in the genus *Aleurites* belonging to the family Euphorbiaceae. They are a relative of Macadamia nuts and resemble them in appearance and in texture. Candle nuts have been used in the manufacture of paints, varnish and soap, and the oil extracted for lamp oil

## CINNAMON

Cinnamon is a spice that is made from the inner bark of trees scientifically known as *Cinnamomum*. Scientists believe that this compound is responsible for most of cinnamon's powerful effects on health and metabolism

## NUTMEG

Nutmeg is the seed or ground spice of several species of the genus *Myristica*. The spice nutmeg has a distinctive pungent fragrance and a warm slightly sweet taste; it is used to flavour many kinds of baked goods, confections, puddings, potatoes, meats, sausages, sauces, vegetables, and such beverages

## TURMERIC

Turmeric is a plant in the ginger family, is native to Southeast Asia and is grown commercially in that region, primarily in India. Its rhizome (underground stem) is used as a culinary spice and traditional medicine. Recently, promoted as a dietary supplement for a variety of conditions, including arthritis, digestive disorders, respiratory infections, allergies, liver disease, depression, and many others

## WHITE PEPPER AND BLACK PEPPER

Like black pepper, white pepper has been found to promote gut health and speed up digestion. White pepper also has very few calories, and can add significant flavor to a dish, lessening the need for salt. While white pepper contains trace amounts of vitamins and minerals (like vitamin C, calcium, iron, and manganese) you probably won't be consuming enough of it to see any measurable benefits

# COFFEE BEANS

## GAYO ARABICA ACEH

Gayo Arabica is a type of unique coffee from the highest-ground of Gayo, Aceh, Indonesia. This coffee has strong thickness and unique aroma. It is known that coffee has much phenolic components such as flavonoids and chlorogenic acids (CGAs) content for neutralizing oxidative stress. Gayo-arabica coffee is a typical arabica coffee which widely used by Gayo people in Aceh, Indonesia.

## ROBUSTA LAMPUNG

Lampung coffee is categorized as one of the best coffees in Indonesia, its distinctive aroma and taste. The type of coffee cultivated by most coffee farmers in the Lampung area is the type of Robusta Coffee. When roasted at medium level (medium roast) its colour is homogeneous, with the fragrance and aroma of coffee powder and shades of chocolate and spices (chocolaty and spicy).
