Product Overview

Coconut fruit is a tropical fruit produced from the *Cocos nucifera* plant, which belongs to the *Arecaceae* family. Coconuts are round in shape on some sides, slightly angular, about the size of a human head. The color of coconuts is green and some is yellow depending on the variety.

Coconut flesh is wrapped in the outer skin in the form of thick fibers and the inside is hard wood or shell. Coconut shell wraps clean white flesh and fruit juice. The water contained in the clear fruit is slightly cloudy, it tastes sweet and refreshing.

Coconut plant habitat is tropical lowlands. This plant has a high tolerance for high salinity soil, therefore it is often found growing on the coast. Even so, coconut trees can still grow in the highlands but their development is slower.
