Our Products

This is some photos from our catalog in Rattan Area. You can choose that your like or you can customize your plan with our expert team production.

www.rattanarea.com

The Process

Step 1

High quality rattan would be woven by the best trained experts from Central Java and Special Region of Yogyakarta which are previously customized it with available design or your plan.

Step 2

When the furniture was been wove, then the furniture would be painted and after that would be sanded. The purpose of sanding is to remove rattan hairs and smoothing the furniture.

Step 3

Finishing that includes secondary painting and coating the furniture with anti-bacterial and fungal spray. After that, the furniture was ready to export after packing it with some additional treatment.
