## About Company

SedoyoRajin (SR) was founded in 2022, SR started production as a supplier that supplies a variety of multi-purpose handicraft items made from environmentally friendly dry plants such as Mendong (Hyacinth), Banana Fronds, Pandan Leaves, to Rattan Wood.

# How does it works?

There are several types of product variations from SR itself such as for the needs of shipping goods, tourism needs, home interior goods, educational props, to the latest we are launching the production of applicative goods for home interiors based on the environmental realm and affordable prices for all circles.

The entire production and quality control is carried out by experts who are experienced in handycrafting for several years.

## **Supplier of environmentally friendly handicraft goods**

To meet the needs of the domestic and international markets so that it can contribute to maintaining the health of our earth.

## **Build strategic cooperation and always improvise**

Prioritizing innovation and feedback from consumers in carrying out environmentally friendly handicraft production, as well as continuous interaction is needed.

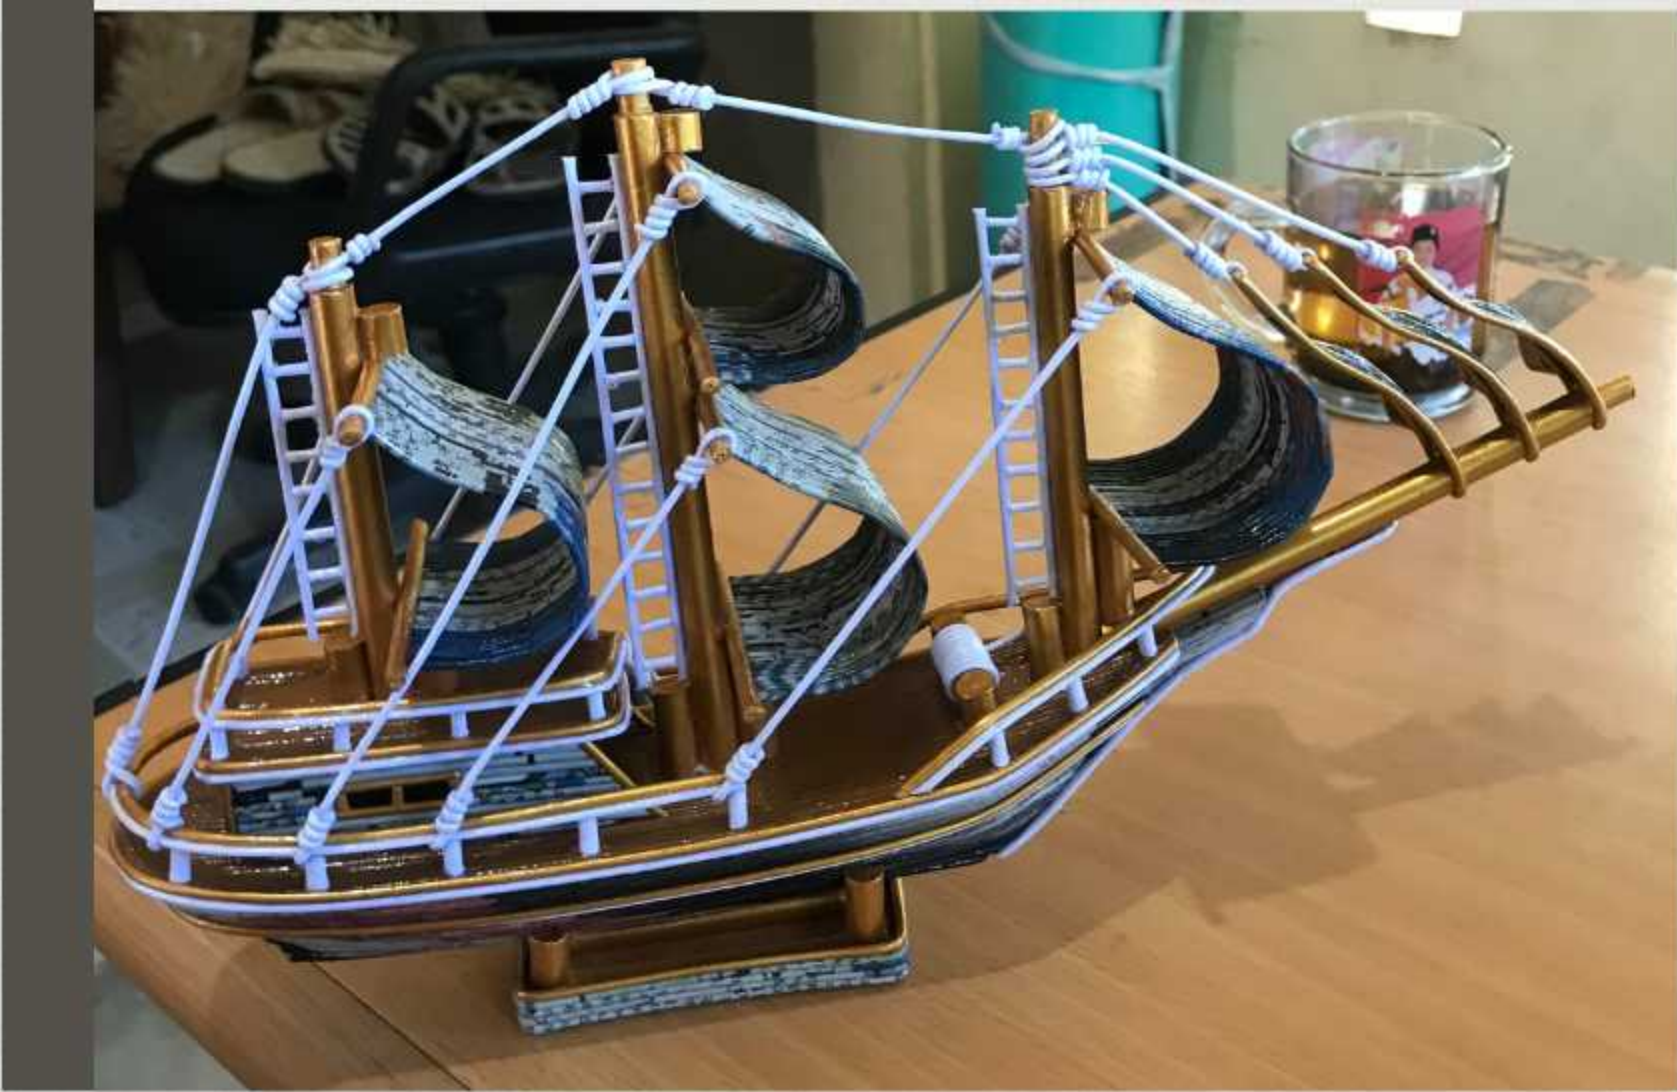

# Building and absorbing human resources and the village economy

The production of handicraft goods is carried out through traditional processes so that beauty and environmental friendliness are maintained

# Handicrafts are fine arts

That have philosophical value and are produced by the human hand itself. Quality and environmentally friendly guarantees are achieved starting from the production process and basic materials which are almost mostly natural.

# Kranjang
