About us

Palm From Indonesia is an agricultural product brand of **PT. Dua Zamrud Khatulistiwa**, located in Tangerang, Banten, Indonesia. Founded by Haidar and Iqbal in 2020, we are committed to support the sustainable agriculture concept by providing the best of Indonesia's natural resources to the world.

Palm From Indonesia connecting the World to Indonesia's Finest Agriculture. Our mission is to enhance lives by bridging the gap between global demand and Indonesia's exceptional agricultural products.

Together, we create a better world.

Healthier life for everyone

Healthier life for everyone, including farmers and their families. By collaborating with farmers, we've started to develop the fairtrade program that will encourage quality improvement in our products. We understand that health is the greatest wealth. Therefore, we will always provide the best of our products to the world, for healthier life.

The Journey

Brand of Palm From Indonesia

founded in 2021 as representative to our first product, the Organic Palm Sugar.

We start a relation with the Indonesian government to promote our product. In **June 2022**, we had a chance to join the exhibition in **Penang, Malaysia** on the PIHC (Pameran Internasional Produk Halal).

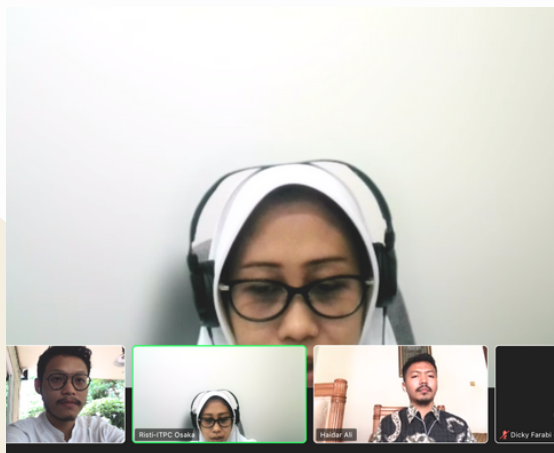

By having our own company, we start to add other product such as vanilla and clove since **August 2022**. At the same month, we succeed to build relation with client from **Japan** and we start to supply the vanilla beans until now.

In **2022**, we succeed to build relation with client from **Sri Lanka** as our first potential client. Until mid-year, after our product passed the lab test finally the client entrusted us to provide the Palm Sugar. At the same time, Sri Lanka was experiencing an economic crisis which forced us to postpone the cooperation.

After previously using the undername company, in **August 2022** we registered our own company under the name **PT. Dua Zamrud Khatlistiwa**.

In **September 2022**, we try to offer our product to the **Canadian** market and had a chance to cooperate with one of the Vanilla Importer in Canada to supply vanilla beans and vanilla powder as an initial order at the end of the year.

Activities

Palm From Indonesia

The Finest Resource from The Archipelago

Explore & discover Indonesia's variety of world class agricultural product. Only with a highly selective process, we offer the finest, most diverse agricultural product in the world. Organic Palm Sugar

Organically Sweet

Details

Palm sugar is one of the sugar palm plant products. It is made from sap tapped from *Arenga pinnata* or *Cocos nucifera* palm sugar flower stalks. The sap is cooked to evaporate the water until it becomes a thick liquid which is then molded into molded-sugar in various forms or cooled while stirring To become fine crystal palm sugar.

Palm sugar has a light caramel flavour and distinctive sweet taste. Not only sweeten food and drinks, but it also has some health benefits. It has a very low glycemic index of 35.
