INTRODUCTION

Indonesia is known as an agricultural country with abundant crops. Therefore, many micro, small and medium enterprises, especially in our region, process various chips made from local raw materials native to Malang Regency. We were born from the potential of Malang Regency's abundant and high-quality natural resources. We process its natural resources into quality products that have two basic concepts of our products, namely unique and delicious.

PT JAVA INDIE EXPORT

OPENING MESSAGE

Satisfying consumers is our primary task, which means putting consumers first in every decision we make. PT Java Indie Export has progressively transformed into a solutions exporting company that operates in all stages of food production, from raw material production and processing, until the product reaches the consumer.

For ready-to-eat foods, we have fulfilled several regulatory requirements as a food processing industry player including Brand Certificate (HAKI), HALAL Certification, SPP-IRT Certificate and Nutrition Test Certificate.

In the future, we will also export other original products from Indonesia.

OWNER & EXPORTIR

WHO WE ARE

- **Profesional**

We always maintain the quality of work according to customer standards. And always maintain the quality of our services. so that we guarantee that what we provide is the best for you.

- **Quality Product**

Using local ingredients from origin Indonesia. Natural ingredients, without crispers and sap leachers. With the "Coating" technique so that the product remains dry, remains crispy, does not stick and does not dirty hands or packaging even though it is wrapped in chocolate or cheese.

- **Fair Price**

We provide goods according to customer orders at very competitive prices, without forgetting the quality that we always uphold.

PT JAVA INDIE EXPORT

VALUES

- Focus on customer satisfaction
- Commitment to premium quality product
- Consistency

PT JAVA INDIE EXPORT

TARGET MARKET

1. Food and Beverage Industry

2. Supermarket/Hypermarket

3. World Wide Shipper

4. Snack Lover

OUR PRODUCTION

As we are a cottage industry, we still use traditional methods to make our chips. Although we use traditional methods, we place great importance on quality, hygiene and product cleanliness. Starting from the selection of quality raw materials, frying to the packaging process.

PT JAVA INDIE EXPORT

POTATO CHIPS

Processed from fresh potatoes from the Tengger region of Malang Regency that are processed immediately after harvest, without boiling and without drying, so that the freshness of the Aira potato chips process is very well maintained, reducing the loss of nutritional content due to the many processing processes. We process them using a coating system, combining the sweetness of caramel and the distinctive taste of cheese for sweet cheese potato chips, with real chilli slices for spicy cheese potato chips and our secret seasoning, creating a unique, crunchy, delicious product with new sensations and flavours.

With competitive prices and excellent quality, PT Java Indie Export's potato chips have become the new favourite snack among chip lovers.

BANANA CHIPS

One of our newest products, these flavoured chips are banana chips with caramelised Honey, Chocolate and Cheese. The flavour will actually taste like honey, chocolate and cheese. But don't worry, despite using honey, chocolate and cheese, these chips are still crispy and dry.

We only use Rojo Molo bananas, which grow abundantly in the eastern part of Malang. This type of banana has a unique texture, resulting in a crispy, tasty and characterful banana chips product. The honey, chocolate and cheese coating system on the bananas makes our chips unique and delicious.

With a standard slice thickness of 1 mm, our banana chips are crisper and tastier.

CASSAVA CHIPS

Cassava chips are very much in demand by almost all circles of society. We innovate by adding spices to these cassava chips. In addition to the original flavour of cassava chips, there are also other flavours used, such as cheese and spicy spices combined with the distinctive caramel process, making a special blend of flavour innovations.

The thin and crispy pieces make anyone love these chips. This time we present cassava chips that have a standard thickness of 1 mm from the raw material of sticky cassava which grows very fertile in the eastern district of Malang specifically for the production of cassava chips, combined with our secret spices. With modern flavours (cheese and spicy), the "coating" technique creates a unique and delicious product. So that the cassava chips from PT Java Indie Export have a different flavour from the existing products in the market. More savoury, crunchier, tastier and more delicious.

TARO CHIPS

We only use local ingredients, namely the super tengger taro which only grows in the eastern part of Malang, precisely on the slopes of Mount Semeru.

This seasoned taro is also one of our flagship products. Wide and large but very thin slices of taro with a standard thickness of 1 mm are the hallmark of our chips. Coupled with a distinctive secret seasoning without the addition of MSG, with a "coating" system instead of sprinkling or dipping, so that even though it is seasoned with several kinds of secret spices, our taro chips remain dry so they are not sticky, and the grains and chilli seeds are still visible. Original savoury taro, cheese and spicy flavours can be enjoyed in each of our packs.

JACKFRUIT CHIPS

One of the typical snacks from Malang which is also an icon of snacks and superior snacks from Malang - Indonesia is jackfruit chips. PT Java Indie Export also provides Aira jackfruit chips which are crispy and delicious and can be enjoyed by everyone, young and old.

The superiority of our jackfruit chips in addition to its excellent quality is also in terms of product net weight and price. With very economical prices and with the actual net weight of the product (the net weight stated is NOT the weight of the product + packaging but the actual weight of the product in the package) which is the advantage and differentiator of our fruit chips from similar products in the market.

SWEET POTATO CHIPS

Purple sweet potato chips are common.
Chocolate sweet potato chips, definitely special!

PT Java Indie Export is always innovating to provide quality snacks that are TASTY and UNIQUE. One of the products we have developed is Aira's chocolate sweet potato chips. Processed from sweet potato (cassava) wrapped in chocolate, with a "coating" system processing so that even though it is wrapped in chocolate, it remains dry. This product presents the delicious traditional flavour of sweet potato and the luxurious taste of chocolate. MUST TRY, because we are the only chips industry that produces this product.
