PRODUCTS AND SERVICES

Manufactured Products

In addition to our import and export services, we have a strong manufacturing division. We specialize in the production of textiles, consumer goods, industrial products, and also process seaweed for various applications. Our manufacturing capabilities allow us to offer customized solutions tailored to our clients' specifications.

Seaweed

Our specialized Seaweed Department sources and supplies premium-grade seaweed directly from farmers. We collect the best-quality *Eucheuma Cottonii* and *Eucheuma Spinosum*, which are used in the hydrocolloid industry. Additionally, we supply *Ulva Lactuca* and *Sargassum Sp* to emerging industries such as bio-degradable plastics and low emission cattle feed production. Our commitment to sustainable sourcing and responsible practices ensures that our seaweed products meet the highest standards of quality and environmental responsibility.

UNIQUE SELLING POINTS AND COMPETITIVE ADVANTAGES:

01

Direct Farmer Collaboration: Our Seaweed Department collaborates directly with local farmers, ensuring a reliable and sustainable supply chain for premium-quality seaweed products.

02

Sustainability and Responsible Sourcing: We are committed to responsible sourcing practices, supporting the preservation of marine ecosystems and contributing to industries focused on sustainability and eco-friendly solutions.

03

Extensive Network and Market Knowledge: With a strong network of suppliers, manufacturers, and logistics partners, we have established efficient supply chains that allow us to offer competitive pricing and timely delivery. Our team's industry expertise and market knowledge enable us to provide tailored solutions and valuable insights to our clients.
